These forward-looking statements, whether made by us or a third party, are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements.

- We have a limited experience of running our technology platform, as a result of which we may not be able to compete successfully, and it may be difficult to evaluate our business and future operating results on the basis of our past performance.
- A significant portion of services forming part of our cash and carry model are executed by third parties, with which we do not have any formal arrangements.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on Page Nos. 25, 125 and 222, respectively, of this Draft Red Herring Prospectus. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect current views as on the date of this Draft Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. *Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition. Further, we generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.*

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers accounted for 96% and 93 % (aprox.) of our revenue from operations for the F.Y. ended March 31, 2023 and the period ended January 31, 2024. A break up of the revenue earned by our Company from the top ten customers during the period ended January 31, 2024 and Financial Years ended March 31, 2023, March 31, 2022 and March 31, 2021:

We have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, we charge a commission on the profit earned by our customers in the physical as well as commodities market, and therefore, on account of lack of format arrangements we cannot assure you that our customers would stress for re-negotiating the terms of our arrangement. Since, we have not entered into any formal arrangements with our customers, we cannot initiate legal actions against them, in the event of breach of arrangement or understanding which was mutually decided. Occurrence of any such events could adversely affect our business, cash flows, results of operations and financial condition.

Further, our revenue is dependent upon our customers earning profit through the trades, on which we assist them for contract execution. In the event our customers earn less profit or no profit at all, we may not receive revenue at par with the services provided by us to our customers. Occurrence of any such events could adversely affect our business, cash flows, results of operations and financial condition. In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfil their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

2. Our business is subject to seasonal and price volatility of commodities in the physical market as well as commodity exchanges, which may contribute to fluctuations in our results of operations and financial condition.

We deal in the commodities market, primarily in agricultural commodities, wherein we offer contract execution services in the physical as well as exchange markets to business owners, farmer producer organization, stockists, farmers, traders, etc. As part of our service offerings we provide services relating to crop procurement and price management solutions, quality inspection, warehousing and contract execution in the physical and virtual commodities market. As part of our arrangements with our customers, we receive a commission at a pre-determined rate from our customers on the profit earned by them during their trades of commodities. Accordingly, our business is sensitive to weather conditions, including extremes such as drought and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. Adverse weather conditions may also cause volatility in the prices of commodities, which may affect the percentage of profit earned by our customers and reduce our revenue share from them. Consequently, the occurrence of any such unfavourable weather patterns may adversely affect our business, results of operations and financial condition.

Our business, financial condition and results of operations is also highly dependent upon the levels of activity on the commodity exchanges, and in particular upon the volume, turnover and number of commodities traded, volatility and similar factors. The prices of commodities could be impacted by factors, which are beyond our control, that may materially adversely affect our business, financial condition and results of operations, include:

- volatility in agricultural produce or prices, and trends in Indian agricultural production and demand and supply scenario;

- changes in domestic and global government policies, including on trade, procurement, storage, support prices for agricultural commodities and subsidies; broad trends in business and finance, including industry specific circumstances, trends in capital and commodities markets; inflation;
- adverse environmental conditions;
- changes in tax policy (including imposition of commodity transaction tax) and tax treaties between India and other countries;
- levy of any additional charge on the Exchange pursuant to changes in regulations; the level and volatility of interest rates; legislative and regulatory changes; and
- unforeseen market closures or other disruptions in trading.

If the prices of commodities on the commodities exchanges are materially adversely affected by any of the factors described above or any other factors beyond its control, our business, financial condition and results of operations could also be materially adversely affected.

3. *We are involved in high volume - low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.*

Ours is a high-volume low margin business. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. We deal in the commodities market, primarily in agricultural commodities, wherein we offer contract execution services in the physical as well as exchange markets to business owners, farmer producer organization, stockists, farmers, traders, etc. As part of our arrangements with our customers, we receive a commission at a pre-determined rate from our customers on the profit earned by them during their trades of commodities. Due to the nature of our services, we may not be able to charge higher margins on our services. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes. For the period ended January 31, 2024 and for the financial years ended March 31, 2023, March 31, 2022 and March 31, 2021, our revenue from operations were and ₹ 1,657.99 lakhs, ₹ 6,680.41 lakhs, and ₹ 1,001.27 lakhs, ₹ 312.60 lakhs, respectively. As part of our growth strategy, we aim to improve our functional efficiency and expand our business operations by developing a technology platform for digitalising and centralising our services. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations for our past results, please see “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” on page 222 of this Draft Red Herring Prospectus.

4. *We have a limited experience of running our technology platform, as a result of which we may not be able to compete successfully, and it may be difficult to evaluate our business and future operating results on the basis of our past performance.*

Our Company has limited experience of running our technology platform. In the year 2023, we had created a digitally native, technology led platform, delivering an interactive procurement, selling and execution services, across our various offerings. The in-house platform was developed to digitalise and centralise our operations and to increase the scale of our business. The platform is proposed to be developed in two phases. Our Company has completed the first phase, wherein the platform has been equipped to facilitate interaction between investors/ end users/ processors for negotiation and execution of contract, procurement or selling of commodities at pre-determined prices. We propose to develop phase two of our platform by utilising a portion of the Net Proceeds of the Issue. For further details, please see the chapter titled “*Objects of the Issue*” on page 81 of this Draft Red Herring Prospectus.

Prior to development of our technology platform, our Company was involved in providing cash and carry services including but not limited to, (i) crop procurement and price management solutions; (ii) quality management solutions with secured warehousing at reasonable prices to store commodities; (iii) arranging for transportation delivery solutions through smart delivery transport partners, etc. We provide the cash and carry service either by offering consultancy services to third parties or by directly trading in commodities in the jurisdictions where we operate. As of date of this Draft Red Herring Prospectus, our Company is majorly executing our operations in the physical form and therefore our Company has limited experience in running the business technology platform. Our limited track record in running operations of the technology platform, such as registration of users, onboarding of intermediaries, execution of contracts, negotiation of prices, addressing technical complaints, etc., exposes us to the risk of incurring time and cost overrun, wastage of resources, which exposes us to risks that more experienced competitors may not face. If we are not able to successfully compete in newer business segments,

our quality of services may suffer, we may not be able to diversify our portfolio, and we may not be able to lower our cost. Moreover, as a result of our relatively shorter operating history, the limited historical data that is available may not be indicative of our financial position or results of operations for any future periods.

Furthermore, our technology platform is dependent upon our ability to onboard intermediaries such as, warehousing service providers, quality testing agencies, banks and financial institutions, *etc.* Phase two of our platform is dependent upon the digitalisation of our warehousing, logistical, quality and financial operations, and if we are unable to execute arrangements with these intermediaries, the success and development of our technology platform could be highly impacted. Further, as of date of this Draft Red Herring Prospectus we engage with warehousing service providers, quality testing agencies without receiving any commission or referral fee from them for engaging them in our cash and carry services. As per our proposal we intend to charge a commission from third party intermediaries for referring them the customers who approach our platform. In the event, the intermediaries refuse to accept such terms or the negotiation of prices takes considerable time, we may not be able to complete phase two of our operations, in a timely manner. In the event of any delay in the schedule of implementation or if we are unable to complete the development of our technology platform as per the scheduled time, it could lead to revenue loss or loss of customers onboarded as part of phase one. If the technology platform is not completed at the scheduled time, our Company may face cash crunch. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected.

5. *A significant portion of services forming part of our cash and carry model are executed by third parties, with which we do not have any formal arrangements.*

As part of our cash and carry model, we help our customers in procurement of crops, quality testing of crops, storing of crops in a warehouse and delivering them to pre-identified locations. Our warehousing, quality and delivery operations are undertaken by third parties intermediaries, with which we do not have any formal arrangements. Accordingly, we do not undertake the aforementioned operations and have engaged third party service providers to execute the same. Since, we do not have formal arrangements, we cannot force third party intermediaries to accept and execute the service requests of our customers. Further, the timely execution of services as part of our cash and carry model is vital to ensure that the customers can buy or sell their commodity at the ideal time to earn profit. In the event, there occurs any delay in executing the operations, the contracts of our customers could be highly affected. In cases where the counter party in commodity contracts are the commodity exchanges, our customers may have to bear penal costs, on account of delay in contract execution or they could also lose the money which was invested in the contract on account of delays. In the absence of formal contracts, we may not be able to litigate our third party service providers, or hold them liable for the loss incurred by the customer.

In the event, we experience significant increase in contract or orders, we cannot assure you that we will be able to meet such increase in demand or find suitable substitutes for our intermediaries, in a timely manner and at reasonable costs, or at all. While, we have informal arrangements with some of the leading third-party intermediaries, however we cannot assure you that our intermediaries would offer quality services to our customers. Agro-commodities are perishable in nature and the quality of the commodities at the time of the purchase or sale and execution needs to be maintained. In the event our warehousing service providers fail to provide a warehouse as per the requirement of our customers, or fails to offer fumigation and inspection services or if there occurs a rodent issue or any other safety and quality issue, our contract execution ability and the safety of our commodity could be adversely impacted. Further, in the event, the quality testing agencies provide a deficient report, the buyer or the commodity exchanges may reject the contract, which could cause a loss to our customers. Any mishap in delivering of commodity to or from the warehouses could also impact our contract execution ability. On account of lack of formal arrangements, we may not be hold our intermediaries accountable for losses suffered by our customers. Our customers may take actions against us for providing deficient services, we may not be able to charge the same from our intermediaries or obtain a refund for the amount spent towards such action. On the occurrence of any of the aforementioned events, we may need to find new intermediaries which could be time taking and costly. We cannot assure you that any other intermediaries that we engage would be able to provide services which are compliant with our quality standards, in a timely and cost effective manner or at all. While the aforementioned events have not occurred in the past, however any future occurrence of any such events could materially affected our financial condition, results of operations and prospects. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such intermediaries or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. Further we are also exposed indirectly to the risks these manufacturers face. For further details, please see “*Our Business*” on page 125 of this Draft Red Herring Prospectus.

6. We significantly rely on revenue earned from trading of commodities, and any interruption or loss of customers in this segment may adversely affect our business and results of operations.

We are engaged in the business of providing integrated cash and carry service across the commodity procurement value chain. We also offer import and export financing assistance wherein we arrange funding for our customers to purchase goods exported from overseas, cover their expenses while they wait for their products to arrive, thereby bridging the gap between the purchase and delivery time of goods. We provide the cash and carry service either by offering consultancy services to third parties or by directly trading in commodities in the jurisdictions where we operate.

Majority of our revenue is earned from trading of commodities and therefore we are dependent upon our trading segment and the loss of any of our customers or suppliers may adversely affect our sales and consequently our business and results of operations. The following table sets out a break up of our revenue from operations from sales of traded goods and sale of services during the period ended January 31, 2024 and the Fiscals 2023, 2022 and 2021:

(₹ in lakhs)

Particulars	Ten month period ended		Fiscal					
	January 31, 2024		2023		2022		2021	
	(₹ in lakhs)	% of revenue from operations	(₹ in lakhs)	% of revenue from operations	(₹ in lakhs)	% of revenue from operations	(₹ in lakhs)	% of revenue from operations
Sales of traded goods								
Domestic	1,042.16	62.86%	5,620.28	84.13%	743.63	74.27%	101.35	32.42%
Export	118.54	7.15%	719.79	10.77%	-	-	-	-
Sale of services	491.78	29.66%	339.46	5.08%	257.64	25.73%	211.26	67.58%
Total	1,652.48	99.67%	6,679.54	99.98%	1001.27	100.00%	312.61	100.00%

Our future success depends in part on our ability to reduce our dependence on our trading services by diversifying our business operations by developing a technology platform for integrating and centralising their services. Any failure to successfully develop our technology platform could adversely affect our business, financial condition, cash flows and results of operations. Our business, growth prospects and financial performance largely depends on our ability to attract new clients, retain our existing clients and effectively implement our diversification and expansion strategies. We cannot assure you that we will be able to achieve the same in a timely and effective manner, on the occurrence of such an event, our business, results of operations and financial condition will be materially and adversely affected.

7. The commercial success of our services depends to a large extent on the success of the end use customers. If there is any downturn in the industries in which the customers operate, it could have a material adverse effect on our business, financial condition and results of operations.

We deal in the commodities market, primarily in agricultural commodities, wherein we offer contract execution services in the physical as well as exchange markets to business owners, farmer producer organization, stockists, farmers, traders, etc. The success of our business operations is dependent upon the success of the business of our customers who seek our services for executing commodity contracts either in the physical market or through the exchanges. Therefore, the commercial success of our business is highly dependent on the commercial viability and success of our customers. Any downturn in the industries in which our customers operate or the demand of the products or services of our customers and end use customers, could have a direct impact on the demand of our services and our business operations. Any disturbance in the industry in which our customers operate could adversely impact our business due to our high dependence on our customers. Alternatively, in the event our customers are able to devise an in-house contract execution unit, or if our customers are able to find a cheaper alternative for our services, it may conversely result in a reduction in the demand of our services and have a material adverse effect on our business, financial condition and results of operations.

8. We provide our services only in the states of Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh, Maharashtra and Telangana, and accordingly any adverse changes in the conditions affecting these regions can adversely affect our business, financial condition and results of operations.

We provide services only in the states of Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh, Maharashtra and Telangana. In the event of a regional slowdown in the economic activity in these states or any other developments including political unrest, disruption or sustained economic downturn or natural calamities in those regions affecting the ability of our merchants to continue their operations within their respective communities, or that make our services and/or products in these states less available or attractive and beneficial to the customer, we may experience an adverse effect on our financial condition and results of operations, which are largely dependent on the performance, geo-political and other prevailing

conditions affecting the economies of the state. The market for our services in Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh, Maharashtra and Telangana may perform differently from, and be subject to, market and regulatory developments that are different from the requirements in other states of India. There can be no assurance that the demand for our services will grow, or will not decrease, in the future, in these regions.

9. *The commodities of our customers are edible items and any actual or alleged contamination or deterioration in the quality of our products could result in legal liability, damage our reputation and adversely affect our business prospects and consequently our financial performance.*

We deal in the commodities market, primarily in agricultural commodities, wherein we offer contract execution services in the physical as well as exchange markets to business owners, farmer producer organization, stockists, farmers, traders, etc. The commodities that we deal in are primarily pulses, nuts, wheat, seeds, maize, spices, etc. We may be subject to risks affecting the agro-based industry, including risks posed by the following:

- contamination/ spoilage of raw materials;
- product tampering;
- product labelling errors;
- consumer product liability claims and expense, and possible unavailability of product liability insurance; and
- the potential cost and disruption of product recalls.

Any actual or alleged contamination or deterioration of our products, even if accidental, could result in legal liability, damage to our reputation and may adversely affect our business prospects and consequently our results of operation and financial performance. The risk of contamination or deterioration in quality exists at each stage from procurement of raw materials from the farmers and third party suppliers, transportation of the raw materials to warehouses, deficiency in upkeep of warehouses and commodities, storage and delivery to buyer or exchange for contract execution. While we follow stringent quality control processes at each stage, there can be no assurance that our products will not be contaminated or suffer deterioration. Further, there can be no assurance that contamination of commodities will not occur during the transportation, procurement, storage and delivery due to reasons unknown to us or beyond our control. If the commodities of our customers are found to be spoiled, contaminated, tampered with or to be associated with any such incidents, the buyer or the commodity exchange will rescind the contract and the amount invested by our customers could be lost completely. Further, our revenue is earned through the commission charged by us on the profit earned by our customers. In the event, there is a loss incurred by our customers, we may also not be able to earn revenue from such orders in which we have invested significant amount of resources. We may also be subjected to liability claims, adverse government scrutiny, investigation or intervention, resulting in increased costs and incur criminal or civil liability. While the aforementioned events have not occurred in the past, however any future occurrence of any such events could materially affected our financial condition, results of operations and prospects.

10. *We intend to utilise a portion of the Net Proceeds for investing in our technology infrastructure and human resources towards development of the commodity platform of our Company. We have procured a quotation from third parties for developing the website and the mobile application, however we have not engaged them for providing this service as of date of this Draft Red Herring Prospectus.*

Our Company is engaged in the commodities market, and offers a bouquet of services to customers proposing to procure or sell commodities either from the physical or the online commodities market. With an intent to digitalise the operations of our Company, in the year 2023-24, our Company created a digitally native, technology led platform to offer an interactive procurement, selling and execution services, across our various offerings to our customers. The platform was required to be developed in two phases and our Company has completed the first phase of development. As part of our first phase, our Company has developed an interactive platform on our website, which can be accessed by our sellers, buyers and stockists by easily registering by making payment of a nominal fee and, upon verification, start using the platform through separate login ids. We intend to continuously upgrade and improve our existing technology infrastructure. As part of phase two, we propose to digitalise all of our operations of our cash and carry model and develop a mobile application, wherein the features of our platform would also be available on the phones of our customers and users. Through our mobile application we intend to provide omni-channel digital offerings, with fully integrated one click actions, through mobile, web and desktop versions. Accordingly, we intend to continue to invest and utilise ₹ 339.52 lakhs from the Net Proceeds towards developing, expanding and enhancing our technological capabilities by (i) developing our website and mobile application; (ii) hiring of employees for operation and maintenance of technical infrastructure; and (iii) purchasing subscription of server for hosting the technical platform and mobile application.

We have obtained quotation from Lavessta Enterprises Private Limited for developing the website and the mobile application on a turnkey basis and have obtained quotation from Oases Technovations Private Limited for recruiting human resources for operating and maintaining our technology platform. Oases Technovations Private Limited has also issued a quote for assisting us in hiring personnel for our customer care centres and branch offices, which are to be set up for supporting the technology platform. As of date of this Draft Red Herring Prospectus, we have not engaged any of the third party agencies for developing our platform or for assisting us in hiring personnel for our platform and offices. We shall be relying on Lavessta Enterprises Private Limited and Oases Technovations Private Limited for developing our platform and therefore the quality of the platform and the personnel hired depends upon the quality of services which shall be provided by the above mentioned entities. Lavessta Enterprises Private Limited shall be developing the entire second phase of the platform for our Company on a turnkey basis and in the event there are any mishaps, termination of quotation, default or delay in service, we may have to terminate the quotation and engage a third party contractor for completing development of our platform. In the event of occurrence of the aforementioned events, our Company may have to revisit our costs, which could lead to our Company utilising the Net Proceeds towards such escalation prices or contingencies or utilising its internal accruals or seeking debt financing. Further, since we have not engaged any of these entities we cannot assure you that the aforementioned entities would provide us the services at the same cost as that of the quotations.

The Net Proceeds will be utilized towards developing our technology platform, therefore, we are yet to engage the services of Lavessta Enterprises Private Limited and Oases Technovations Private Limited or place orders for any equipment which will be required for setting up of the technology platform. The cost of developing and execution of the platform and for hiring the personnel based on the industry standard of the remuneration is based on the quotations received from Lavessta Enterprises Private Limited and Oases Technovations Private Limited and such quotations are subject to change due to various factors such as, variation in cost of equipment, change in the government regulation and policies, change in management's view of desirability of the current plans, possible cost overruns, *etc.* Further, the quotation for hiring of personnel are also subject to variation in the remuneration payable as per the industry standards. Delay in engaging third party service providers may cause time and cost overrun in the implementation of our platform and can also compel us to execute the platform at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

- 11. *We propose to use a part of the Net Proceeds of the Issue towards funding expenditure proposed to be incurred towards setting up of branch offices in Ahmedabad and Hyderabad and customer care center in Mumbai. We are yet to identify locations and enter into long-term leasehold arrangements or enter into rental agreements at locations suitable for branch offices or customer care center. In case we are unable to open the branch offices and customer care center in a timely manner as mentioned in the chapter "Objects of the Issue", we may fall short of the revenue targets of the Company and this would have an adverse effect on our business, financial condition, results of operations and growth prospects.***

In order support our technical platform, we intend to set up a customer care center, from where our teams shall (i) resolve the technical complaints registered by our customers; (ii) undertake execution of contracts and negotiation of prices between buyers and sellers; and (iii) undertake coordination with stakeholders to ensure that the contracts and orders are executed on time. Further, in order to support the proposed technology platform, we intend to set up additional two branch offices in Ahmedabad and Hyderabad, from where our marketing teams shall market our platform and attract new buyers and sellers. Accordingly, we intend to utilise a portion of the Net Proceeds towards funding costs relating to rent and security deposit for obtaining a lease for branch offices and customer care centers. The fund requirement mentioned in the chapter titled, "*Objects of the Issue*" is based on the quotation received from various real estate agencies. Further, we are highly dependent upon such real estate agencies for execution of our growth strategy.

As we expand our branch network, we will be exposed to various challenges, including those relating to identification of potential markets and suitable locations, obtaining land / buildings or leases for such offices, competition, different cultures and customer preferences, regulatory regimes, business practices, onboarding new employees and intermediaries. Our success also depends on our ability to identify and acquire key retail spaces in a timely manner at such locations with attractive commercial propositions, suitable locations and reasonable costs. As a new office location should satisfy various parameters to make an attractive commercial proposition, finalisation of location and property acquisition for our new offices is an evolving process which may not progress at the same pace as it did in the past or at the expected pace. Further, delay in setting up new offices will impact the revenue targets of the Company which may also have an adverse impact on the revenues of the Company. Further, we expect our expansion plans to place significant demands on our managerial, operational and financial resources, and our expanded operations will require further training and management of our employees. In addition, as we enter new locations, we will face competition from regional, national or international players, who may have an established local presence, and may be more familiar with local customers'

preferences, business practices and customs. Further, there could be delays in setting up the new offices as a result of, among other things, contractors' failing to perform, disputes with workers, or force majeure events, any of which could give rise to cost overruns and delays in our implementation schedule.

12. *We rely extensively on our information technology systems and any failure, disruption or weakness in such systems, or breach of data, could adversely affect our operations and reputation. Further, our success depends on our ability to innovate, upgrade and adapt to new technological advances.*

We are extensively dependent on the information technology systems (“**IT Systems**”) for operating our technology platform and our ability to efficiently and reliably process volume of transactions across various locations, as well as for certain critical functions including financial controls, risk management and transaction processing. Any disruption to our IT Systems or our ability to process our transactions efficiently and reliably, may adversely affect our operations, reputation and our financial position. In addition, our success will depend, in part, on our ability to respond to and keep pace with new technological advances and consumer trends and other services industry standards and practices in a cost-effective and timely basis. The development and implementation of such technology, including with respect to new operating systems, entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction processing systems to customer requirements or improving market standards. Weakness, disruption, breach or failure in our IT Systems may have significant consequences on our business, financial condition and results of operations, including disabling or malfunctioning of our data processing systems; inability to or a deterioration in servicing our customers on a timely basis or at all; non-availability of certain information for our management in order to enable them to plan for or respond to contingencies and changes in market conditions in a timely manner or at all; and loss of confidential or material data in relation to our business, operations, financial products and services and employees.

13. *Our inability to continue to implement our marketing initiatives could adversely affect our business and financial condition.*

The ability to differentiate our services from our competitors through our marketing and advertising programs is an important factor in attracting customers. In order to create our brand presence and to create awareness of our platform and service offerings, we engage in various marketing meets. Our teams stationed at our branch offices, in order to onboard additional traders and FPOs, holds marketing events and meets in various states to onboard them on our offline and online offerings. Through our marketing activities, we believe we will be able to expand our geographical presence and offer a diverse range of procurement solutions on our platform. Creating and maintaining public awareness of our services and our platform is crucial to our business and we accordingly invest in various marketing and advertising initiatives. If these initiatives are poorly executed or fail to elicit interest in potential customers, or customers lose confidence in our services for any reason, it could harm our ability to attract and retain customers. Developing, promoting and positioning our brand will depend largely on the success of our marketing initiatives, the relationships we have with our customers and our ability to provide a consistent, high quality experience for our customers. To promote our services, we have incurred, and expect to continue to incur, substantial expenses related to advertising and other marketing initiatives. Furthermore, there can be no assurance that our marketing efforts will succeed in maintaining our services and its perception with customers.

14. *We depend on third parties for the transportation needs of our customers and for transporting goods as part of our direct trading operations. Any disruptions may adversely affect our operations, business and financial condition. Further, we do not have in-transit insurance for the products that are delivered for our customers, suppliers or buyers by the transport agent.*

We rely on third party transportation and other logistic facilities for transporting commodities of our customers from farmers or farmer produce organisations to warehouses and from warehouses to buyers or commodity exchanges. We also rely on third-party transportation agencies for transporting commodities from suppliers and buyers as part of our direct trading business. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third party transport service providers and engage them on a needs basis. We rarely enter into written documentation in relation to the transportation services we hire which poses various additional risks including our inability to claim insurance. Further, the cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost efficient manner. Further, the profit share of our Company may reduce on account of increased expenses of our customers from increased transportation costs including as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lockouts, accidents, inadequacies in road infrastructure or other events. We cannot assure you that any such disruptions may not occur in future and any such prolonged disruption or unavailability of such facilities

in a timely manner could result in delay in execution of contract, which could lead to termination of contracts or penal actions being taken against the customers, who may in turn take legal actions against our Company. Our Company may be held liable for any damages that are caused to the commodities of our customers, buyers and suppliers. Such losses can adversely affect our profitability and our Company's reputation. Our Company does not have in-transit insurance for transportation of commodities of our customers, therefore if damage is caused to the goods during the process of such deliveries or in case of accidents or in case of theft by the delivery persons, such damages are to be borne by our customers or by our Company, which may increase our Company's liability, reduce our revenue share and can adversely affect the profitability and reputation of our Company.

15. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

(₹ in Lakhs)

Particulars	January 31, 2024	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash Flow from/ (used in) Operating Activities (A)	88.76	114.81	(9.92)	16.05
Net Cash Flow used in Investing Activities (B)	6.23	(1.96)	2.39	(2.15)
Net Cash Flow used in Financing Activities (C)	(253.21)	25.84	33.83	1.16
Net increase / (Decrease) in Cash & Cash Equivalents (A+B+C)	(158.22)	138.69	26.30	15.06

Cash and cash equivalents at year/ period end	31.51	189.73	51.04	24.74

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer "Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 174 and 222, respectively.

16. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- continuing cordial relations with warehousing service providers, quality testing agencies and logistical service providers;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page 222 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

17. The proposed objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled "Objects of the Issue" are based on the company's estimates and internal research. We may have to revise our

management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

18. Our Company has issued Equity Shares in the last one year at a price which is lower than the Issue Price.

We have issued Equity Shares in the preceding one year at a price which is lower than the Issue Price. The details of the Equity Shares have been provided below:

Date of allotment	Number of Equity Shares allotted	Face value (₹)	Issue price per Equity Share (₹)	Reason for allotment	Whether part of Promoter Group	Name of allottees
March 11, 2024	1,35,000	10	92	Preferential Allotment	No	Equity Shares have been allotted to Nidhi Pankaj Nagar

We cannot assure you that any issuance of Equity Shares made by our Company post completion of this Issue will be above the Issue Price or the prevailing market price of our Equity Shares. For further details, please see “*Capital Structure*” on page 71.

19. We face several risks associated with the booking warehouse spaces, which could hamper our growth and consequently our business, results of operations and financial condition.

In order to ensure effective and timely execution of contracts through our technology platform, we intend to book warehouse spaces in different cities for our customers, by paying security deposit to GoGreen Warehouse Private Limited. We propose to utilise an amount of ₹ 40.00 lakhs from the Net Proceeds towards booking warehouse space with GoGreen Warehouse Private Limited. For more details on the utilization of the Net Proceeds, please see the section titled ‘*Objects of the Issue*’ on page 81. While, we propose to book warehouse spaces, however the same is subject to completion of development of our technology platform and receipt of adequate orders in our technical platform. The warehousing spaces that are proposed to be booked by us are subject to a time limitation of one year and in the event during that time if we are unable to complete the development of our platform or are unable to receive adequate orders for storing commodities, the warehousing spaces may not be adequately utilised and our deposit may be forfeited. In the absence of business opportunities and warehousing demand on our platform, we may need to cease operations at our warehouses, including termination of our arrangement with GoGreen Warehouse Private Limited. Moreover, if we along with the warehousing service providers, are unable to properly preserve and maintain the commodities stored in our warehouses and provide quality services to our customers, as a result of which the quality of the commodities is compromised, we could be in breach of our contractual obligations to our customers which could lead to, amongst others, monetary and reputational damage. The computation of storage capacity of a warehouse and utilization level thereof can vary depending upon, amongst other factors, the mix of commodities stored, the size of the warehouse, the infrastructure available and the formulae used for calculation. Our Company cannot assure that we will be able to utilise all of our warehousing spaces, if there is any disruption in lack of demand for our services. Any failure to cope adequately with such disruption or lack of demand would have an adverse effect on our Company’s business, results of operations and financial condition.

20. We intend to utilise a portion of the Net Proceeds towards purchasing hardware and software for the technology platform. We are yet to place orders for such products.

Our Company intends to utilise a portion of the Net Proceeds towards (i) purchasing subscription of server for hosting the technical platform and mobile application; and (ii) purchasing hardware such as desktops, laptops and tablets. Our Company is engaged in the commodities market, and offers a bouquet of services to customers proposing to procure or sell commodities either from the physical or the online commodities market. With an intent to digitalise the operations of our Company, in the year 2023-2024, our Company created a digitally native, technology led platform to offer an interactive procurement, selling and execution services, across our various offerings to our customers. The platform was required to be developed in two phases and our Company has completed the first phase of development. In order to develop the second phase of our platform, we intend to purchase servers for hosting the technical platform and mobile application and purchase hardware such as desktops, laptops and tablets, for the employees who shall be operating and maintaining our platform and running our customer care center and branch offices. Accordingly, we wish to utilise a portion of the Net Proceeds towards purchasing subscription of Microsoft Azure for a period of one year and for purchasing hardware such as desktops, laptops

and tablets. Our Company is yet to place orders worth ₹ 150 lakhs for purchasing the aforementioned services and products. Further, the cost of the server and the hardware is based on the details available on the Microsoft website and quotations received from dealers and such quotes are subject to change due to various factors such as, change in the government regulation and policies, change in management’s view of desirability of the current plans, possible cost overruns, etc. Since, our Company has not yet placed orders for the said software and the hardware, we cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. Delay in procurement of the same can compel our Company to buy such materials at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

21. There have been instances of delay in repayment of loans in the past.

There have been instances of delayed repayment of borrowings in the past. The details of the same have been provided below:

Banks	Details of Loans availed	Financial Year in which delay occurred	Amount of default	Period of default (in days)

Clix Capital Service Pvt Ltd	Business Loan	2022-2023	0.74	1
Aditya Birla Finance	Business Loan	2023-2024	0.90	2
HDFC Bank	Car Loan	2020-2021	0.22	1

HDFC Bank	Car Loan	2020-2021	0.10	1
HDFC bank	Car Loan	2020-2021	0.10	1

For further details, please see – “History and Certain Corporate Matters- Defaults or rescheduling/restructuring of borrowings with financial institutions/banks” on page 150.

We cannot assure you that there will not be any future instances in delay or default in repayment of borrowings or request our lenders to reschedule of our loans. We also cannot assure you that any of our requests in this regard would be accepted by our lenders or it would not trigger any restrictive covenants or events of default as per the agreements executed with our lenders. Occurrence of any of the aforementioned events, could affect our cash flows, financial condition and business operations.

22. One of our Promoters have extended personal properties as collateral for securing the facilities availed by our Company. Withdrawal of such properties may adversely affect our business operations and financial condition.

Our Promoter Rupesh Pravinchandra Dalal has provided his personal property as collateral for securing the loans availed by our Company from RBL Bank Limited and Indostar Capital Finance Limited. In the event if the personal property of our Promoter is withdrawn, our lenders may require us to furnish alternate properties or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative properties in a timely manner or at all. If the properties are withdrawn, the ability of our Company to continue its business operations could be adversely affected. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “Financial Indebtedness” on page 219 of this Draft Red Herring Prospectus.

23. We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.

Our business strategy involves a relatively high level of ongoing interaction with our clients and intermediaries. We believe that this involvement is an important part of developing our relationship with our clients and intermediaries, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

24. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "Government and Other Approvals" beginning on page 242 of this Draft Red Herring Prospectus.

25. *Our Company has availed certain unsecured loans which may be recalled at any time.*

Our Company has availed certain unsecured loans, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see "Financial Indebtedness" on page 219 of this Draft Red Herring Prospectus.

26. *Cybersecurity threats continue to increase in frequency and sophistication. A successful cybersecurity attack could interrupt or disrupt our information technology systems or cause the loss of confidential or protected data, which could disrupt our business, force us to incur excessive costs or cause reputational harm.*

During the ordinary course of business, we collect, store, process, transfer, and use a wide range of confidential information, including personally identifiable information, for various purposes, including to follow government regulations and to provide services to our customers. The information we collect may be sensitive in nature and subject to a variety of privacy, data protection, cybersecurity, and other laws and regulations. Due to the sensitivity and nature of the information we process, as well as the size and complexity of our information systems, we are the target of, defend against and must regularly respond to cyberattacks, including from malware, phishing or ransomware, physical security breaches, or similar attacks or disruptions. If our security measures are breached or unauthorized access to customer data is otherwise obtained, our solutions may be perceived as not being secure, and we may incur significant liabilities. While we have invested in the protection of data and information technology, there can be no assurance that our efforts will prevent or quickly identify service interruptions or security breaches. Any such interruption or breach of our systems could adversely affect our business operations and result in the loss of critical or sensitive confidential information or intellectual property, and could result in financial, legal, business and reputational harm to us.

27. *We may not be able to provide solutions that meet our clients' requirements, which could lead to clients discontinuing their work with us, which in turn could harm our business.*

We deal in the commodities market, primarily in agricultural commodities, wherein we offer contract execution services in the physical as well as exchange markets to business owners, farmer producer organization, stockists, farmers, traders, etc. We have also set up a technology platform for digitalising and centralising our operations for our customers and for expanding the scope of our operations. In order to ensure the successful execution of the platform, we will be required to establish closer relationships with our clients and potentially with other technology service providers and vendors and require a more thorough understanding of our clients' operations. Our ability to establish these relationships will depend on a number of factors including the proficiency of our technology professionals and our management personnel. We may face challenges to successfully diversify and develop our services in response to evolving trends and demands may adversely affect our growth and negatively impact our profitability. Our service offerings may fail to accurately address our clients'

or users requirements and may not generate the returns as anticipated. We may be required to discontinue such offering and we may not be able to recover the expenses incurred in developing and launching such offerings. There can be no assurance that there are no other services that will be discontinued in future. Thus, if we are unable to attain a thorough understanding of our clients' operations, our service offerings may not effectively meet client needs and jeopardize our client engagements, which may negatively impact our revenues and financial condition. Any inability to manage the scale of operations could cause clients to lose confidence in our offerings and may choose not to use our services. Further, it may also adversely impact our reputation which may in turn adversely impact our financial condition and results of operations.

28. *One of our Promoter Group entity is engaged in a similar line of business as our Company and may compete with us.*

Our Promoter Group entity, New Edge Commodities Private Limited has been incorporated to engage in the same business as our Company, and may have common pursuits with our Company. We cannot assure you that there will be no conflict of interest in allocating business opportunities between us and our Promoter Group entity going forward. While, there is currently no active conflict between our Promoter Group entity and our Company, however we cannot assure you that there will not be any conflict of interest in allocating business opportunities between us and our Promoter Group entity going forward. We have not entered into any non-compete agreement with our Promoter Group entity, and there can be no assurance that our Promoter Group entity will not compete with our existing business or that we will be able to suitably resolve any such conflict without an adverse effect on our business and financial performance.

29. *Stringent and changing laws and regulations relating to privacy and data protection could result in claims, harm our results of operations, financial condition, and prospects, or otherwise harm our business.*

We are subject to a numerous laws, rules, directives, and regulations, as well as contractual obligations, relating to the processing privacy and the collection, storing, sharing, use, disclosure, and protection of certain types of data, including personal information. The regulatory framework for privacy and data protection worldwide is rapidly evolving and, as a result, implementation standards and enforcement practices are likely to continue to evolve for the foreseeable future.

As part of our operations, we are required to comply with the Information Technology Act, 2000 and the rules thereof, which provides for civil and criminal liability including compensation to persons affected, penalties and imprisonment for various cyber related offenses, including unauthorized disclosure of confidential information and failure to protect sensitive personal data. India has already implemented certain privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and or Information) Rules, 2011, which impose limitations and restrictions on the collection, use, disclosure and transfer of personal information. Additionally, the Government of India, in November 2022, published the Digital Personal Data Protection Bill, 2022, which sets out the rights and duties of the citizen (Digital Nagrik) and the obligations of the data fiduciary to use the collected data lawfully. As part of the compliance framework, it envisages the setting up of a Data Protection Board of India to determine non-compliance, to impose penalty for such non-compliance, and perform such other functions as the Central Government. Our failure to adhere to or successfully implement processes in response to changing regulatory requirements in this area could result in legal liability or impairment to our reputation in the marketplace, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Compliance with current or future privacy and data protection laws (including those regarding security breach notification) affecting personal information to which we are subject could result in higher compliance and technology costs and could restrict our ability to provide certain products and services (such as products or services that involve us sharing personal information with third parties or storing personal information), which could materially and adversely affect our financial position and could reduce income from certain business initiatives. Our failure, or the failure of any third party with whom we conduct business, to comply with privacy and data protection laws could result in potentially significant regulatory investigations and government actions, litigations, fines, or sanctions, consumer, funding source, bank partner, and damage to our reputation and brand, all of which could have a material adverse effect on our business. Complying with privacy and data protection laws and regulations may cause us to incur substantial operational costs or require us to change our business or privacy and security practices. We may not be successful in our efforts to achieve compliance either due to internal or external factors, such as resource allocation limitations or a lack of cooperation from third parties. Although we have not received complaints or notifications from third parties, alleging that we have violated applicable privacy and data protection laws and regulations, we cannot assure you that this will not occur in the future. Non-compliance could result in proceedings against us by governmental entities, customers, or others. We may also experience difficulty retaining or obtaining new customers in these jurisdictions due to the legal requirements, compliance cost, potential risk exposure, and uncertainty for these entities, and we may experience significantly increased liability with respect to these consumers pursuant to the terms set forth in our agreements with them.

30. *Our inability to cater to unanticipated surges or increases in transaction volumes may adversely impact our financial performance.*

Continued increases in transaction volumes may require us to expand and adapt our network and technology infrastructure to avoid interruptions to our systems and technology. Any unanticipated surges or increases in transaction volumes across any or all of our products may cause interruptions to our systems and technology, reduce the number of completed transactions, increase expenses, and reduce the level of customer service, and these factors could adversely impact our reputation and, thus, diminish consumer confidence in our systems, which may result in a material adverse effect on our business, results of operations and financial condition.

31. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

32. *We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.*

In deciding whether to onboard a customer on our platform and to rely upon credibility of the sellers and buyers to execute their contractual obligations or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness we do not obtain any independent support from credit information companies or credit bureaus and on independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

33. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The industries in which we operate are competitive with both organized and unorganized markets. We may be unable to compete with the prices and services offered by our competitors. We may have to compete with new players who enter the market and are able to offer competing services. Our competitors may have access to greater financial, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the prices and payment terms of our services. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have services with better brand recognition than ours. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with services at more competitive prices. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands, which may require us to similarly increase our marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition.

34. *Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain secured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.*

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain secured borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net

Proceeds have been disclosed in the section titled “*Objects of the Issue*” on page 81 of this Draft Red Herring Prospectus. While we believe that utilization of Net Proceeds for repayment of secured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

35. *The commodities trading industry has been and continues to be subject to strict regulatory requirements and scrutiny. Any adverse change in regulations governing our services or commodity trading, may adversely impact our business prospects and results of operations.*

An adverse change in the regulations governing the development of our services, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. The commodities trading industry has been and continues to be subject to strict regulatory requirements and scrutiny, and we face the risk of changes to laws, regulations or governmental policies that may diminish trading volumes or have an adverse effect on the way the commodity futures exchanges conduct their business and the results of their business operations. In addition, the Government of India places restrictions on the type of commodity futures contracts that can be traded, and the type of investors that can participate in investment activities, in India. Ministry of Consumer Affairs may introduce changes in laws, regulations or governmental policies which could have an adverse effect on the way commodity contracts are traded on commodity exchanges. In the event there occurs any significant changes in the commodities and quality of commodities traded on the commodity exchanges, we may have to revise our service portfolio to align it with the change in the regulatory regime. New legislation, regulations or enforcement may require our Company to allocate more resources to regulatory compliance and oversight, impede our ability to operate and grow our business, which would adversely affect our business, financial condition and results of operations.

36. *Any delay or default by our customers in making our payments could result in reduction of our revenue share and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.*

As per our revenue model, we earn commission over and above the profit earned by our customers to whom we provide cash and carry services. We also earn revenue through directly trading in commodities in the jurisdictions where we operate. In the event there occurs a delay in executing of contracts or any deficiency in execution of contracts by our third party intermediaries, the revenue which we earn from our customers could significantly decline. Further, there can also be instances wherein our buyer counterparties in our trading segment, may delay or default in making payment for the commodities purchased from us. It may also happen that we may not be able to earn revenue equalling to the proportion of work conducted by us on a contract or earn any revenue at all, thereby impacting our ability to earn income equivalent or over and above the expenditure incurred by us. Any adverse changes in the commodity markets could also adversely impact our revenue share. Our financial position and financial performance are dependent on the creditworthiness of our customers, ability of our third party intermediaries in providing quality and timely services and the probability of our customers to earn profits from their trades.

Our customers or buyer counterparties may also commit delays or defaults in making payment towards our services. If a customer or a buyer counterparty defaults in making its payments on a contract on which our Company has devoted significant resources, or if a contract in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition. There is no guarantee on the timeliness of all or any part of our customers’ or buyer counterparties’ payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

37. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the commodities industry, changing customers’ taste and preferences may prevent us from expanding our presence or increasing the penetration of our services. Further, customers may be price conscious and we may be unable to compete effectively with the services of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of

each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of services and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our services to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

38. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our Company is currently using logo  , which is not yet registered in the name of our Company. While, we have made applications for registering the name and logo of our Company, however the application is pending for approval. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled “*Our Business*” and “*Government and other Statutory Approvals*” on pages 125 and 242, respectively of this Draft Red Herring Prospectus.

39. *Our Promoters, Directors, Senior Management and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors, Senior Management and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director, Senior Management and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 158, 168, 219, and 174, respectively of this Draft Red Herring Prospectus.

There can be no assurance that our Promoters, Directors, Senior Management and Key Managerial Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

40. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger,

consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

41. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a book building basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "Capital Structure" on page 71 of this Draft Red Herring Prospectus.

42. We are exposed to foreign currency exchange rate fluctuations, which may impact our results of operations and cause our results to fluctuate. Our inability to manage our foreign currency risk may harm our results of operations and cause our results to fluctuate and/or decline.

Our financial statements are presented in Indian Rupees. However, our revenue and expenses are influenced by the currency of foreign countries. Our Company's activities / operations are confined to India and outside India as such there is two geographical segment. A revenue break up of our revenue from operations earned from domestic and international operations have been provided below:

As part of our contract execution services under import and export operations relating to various commodities, we undertake key functions such as import-export finance, quality testing and logistics for our customers. We also directly trade commodities in the Indian and international jurisdictions. The amount of commission earned by us is a percentage of amount financed by our customer through us from banks and financial institutions. Further, the revenue earned as part of our international trading business is also in foreign currency. In certain cases, the amount financed is in foreign currency and therefore the revenue earned from these operations is also susceptible to foreign currency fluctuations. Further, due to the time gap between the accounting of purchases and actual payments, the foreign exchange rate at which the purchase is recorded in the books of accounts may vary with the foreign exchange rate at which the payment is made, thereby benefiting or affecting us, depending on the appreciation or depreciation of Rupee as compared to the foreign currency. We may, therefore, be exposed to risks arising from exchange rate fluctuations, suffer losses on account of foreign currency fluctuations for our material procurement and/or payments received and we may not be able to pass on all losses on account of foreign currency fluctuations to our customers. As on date of this Draft Red Herring Prospectus, we do not have any hedging policy to mitigate the losses on account of foreign currency fluctuations. There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our inability may harm our results of operations and cause our results to fluctuate and/or decline.

43. Our future fund requirements, in the form of further Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further Issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

44. Our Registered Office and our branch offices are located on premises which are not owned by us and has been obtained on lease basis. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our operations and, consequently, our business, financial condition and results of operations.

As on the date of this Draft Red Herring Prospectus, our Registered Office and our branch offices in Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh and Telangana are located on properties taken on lease basis from third parties. The details of the leasehold properties have been provided below:

Once the aforementioned lease agreements, expire, there can be no assurance that our Company will be able to successfully renew the said lease agreements in a timely manner or at all or on terms favourable to us. Further, there can be no assurance that we will not face any disruption of our rights as a lessee and that such lease agreements will not be terminated prematurely by the lessor. Any such non-renewal or early termination or any disruption of our rights as lessee will adversely

affect our business, financial conditions and results of operations. For further details, see “*Our Business – Properties*” on page 139.

45. *Our Company had undertaken a preferential allotment of Equity Shares which was not in compliance with certain requirements of the Companies Act, 2013. Additionally, there have been instances in the past where our Company failed to file statutory forms with the RoC, in compliance with Companies Act, 2013.*

Our Company had undertaken a preferential allotments on March 11, 2024, wherein it had failed to receive funds in a separate bank account and had also failed to file Form. MGT-14 in respect of the resolution passed by the Shareholders, prior to dispatch of Form PAS-4, in accordance with Section 42 of the Companies Act and Rule 14 of the Companies (Prospectus and Allotment of Securities) Rules, 2014. Further, our Company has not filed Form CHG-1 for registering a charge with the RoC in respect of the loans availed by our Company from RBL Bank Limited and Indostar Capital Finance Limited, in which the personal property of our Promoters has been provided as security.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

46. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of January 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. While we believe that all our related party transactions have been conducted on an arm’s length basis and in accordance with the provisions of the Companies Act, 2013, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 174.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

47. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 219 of this Draft Red Herring Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

48. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 219 of this Draft Red Herring Prospectus.

49. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 81 of this Draft Red Herring Prospectus.

50. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 153 of this Draft Red Herring Prospectus.

51. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability. Presently, we maintain car insurance policies for insuring vehicles owned by us and insurance policy for insuring our employees. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by

us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

52. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 173 of this Draft Red Herring Prospectus.

53. *The data and statistics added in this Draft Red Herring Prospectus may be incomplete or inaccurate or may not be comparable to statistics produced elsewhere.*

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

54. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

55. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for purchasing plant and machinery, primarily, as detailed in the chapter titled “*Objects of the Issue*” beginning on page 81 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

56. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently

intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

57. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

58. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

59. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

Our Company intends to use the Net Proceeds towards funding of working capital requirements and repayment of unsecured borrowings. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as disclosed in the section titled "Objects of the Issue" on page 81.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Draft Red Herring Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Draft Red Herring Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus, even if such

variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

60. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within three (3) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

61. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

62. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

63. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

64. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

65. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 ("**Finance Act**"). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 ("**PDP Bill**") was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India ("**MoEIT**") has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

66. Our business is substantially affected by prevailing economic conditions in India.

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

67. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

68. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

69. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

70. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

71. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

72. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the

Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 266 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed prepandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers' income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

Source: Global recovery remains slow, with growing regional divergences and little margin for policy error

OVERVIEW OF THE INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL AGRICULTURAL MARKET

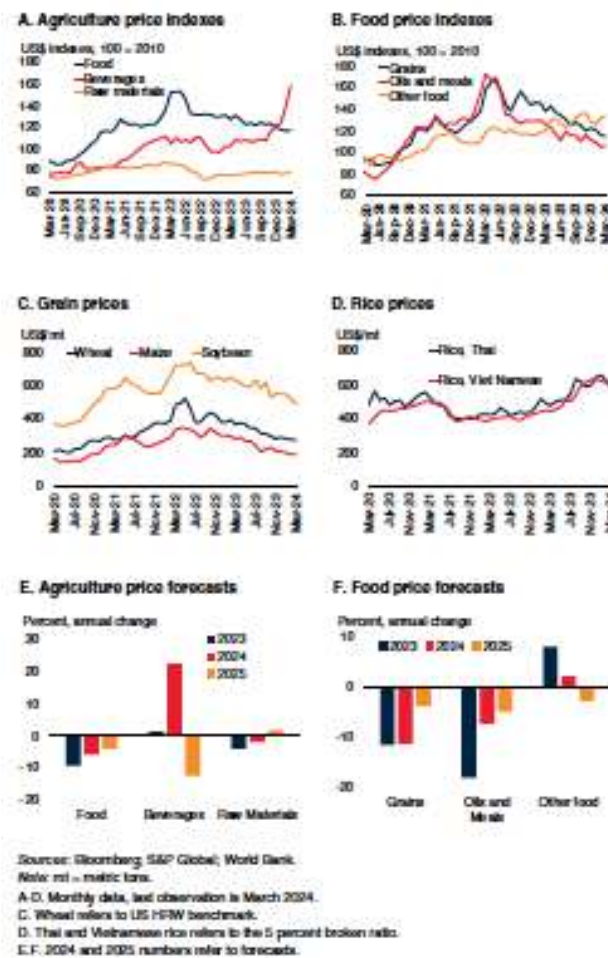

The World Bank's agriculture price index edged up in early April, driven by pronounced spikes in cocoa and coffee prices. The index was unchanged in 2024Q1 (q/q), as a 4 percent decline in food prices offset a 22 percent increase in beverage prices. Favorable global supply conditions, including robust exports from the Black Sea region, weighed on food prices. In contrast, poor weather conditions, in part linked to El Niño, had pushed cocoa and Robusta coffee prices to record highs by the end of Q1, a trend that extended further in early April. The agriculture price index is expected to decline modestly in 2024 and 2025 (1 and 4 percent y/y, respectively) as supplies increase and El Niño conditions abate. The food price index is expected to steadily soften, by 6 percent in 2024 and 4 percent in 2025. In contrast, beverage prices are projected to increase by 22 percent in 2024 before declining by 12 percent in 2025. Raw material prices are forecast to decrease by 2 percent in 2024 before rising by 2 percent in 2025. Risks to the price forecast, which are tilted to the upside, relate to the path of input costs, trade disruption in the Red Sea, the potential emergence of La Niña, and, in the longer term, biofuel policies.

The World Bank's food price index eased in early April after falling by about 4 percent in 2024Q1 (q/q), to a level 9 percent lower than a year earlier. Subcomponent indexes for grains, oils and meals, and other foods fell by between 2 and 5 percent (figures 8.A and 8.B). Maize prices tumbled by about 11 percent and wheat prices declined by 4 percent in 2024Q1, together driving the 4 percent reduction in the overall grains index (figure 8.C). Both wheat and maize prices hit three-year lows during the quarter, with the downtrend continuing in early April. The decline in maize prices was attributed to competitively priced offers from the Black Sea region, larger production in major exporters, and favorable prospects for the next harvest, with global maize production in the 2023-24 season expected to increase by 6 percent to an all-time high. Downward pressure on wheat prices derived from robust exports from Russia and Ukraine and the second-highest global production on record in 2023-24. The collapse of the Black Sea Grain Initiative had minimal fallout, as Ukraine has so far been able to continue exporting via seaborne corridors and new overland routes. Rice prices increased by about 4 percent in 2024Q1 (q/q), standing 28 percent higher than a year earlier, reflecting supply concerns in major exporting countries related to El Niño and continued export restrictions from India. However, prices retreated in February, March, and early April, reflecting the depreciation of Thailand's baht and Viet Nam's dong against the U.S. dollar, sluggish global rice demand amid increased prices, a seasonal supply increase from the harvest in Viet Nam, and ongoing off-season harvests of irrigated fields in India and Thailand (figure 8.D). The oils and meals price index declined by 5 percent in 2024Q1 (q/q), reaching a level 17 percent lower than a year earlier. This decline was driven by a 14 percent fall in soybean oil prices, a 13 percent drop in soybean meal prices, and a 5 percent decrease in soybean prices, partly offset by an 8 percent increase in palm oil prices. Downward pressures on soybean prices stemmed from near-record production in Brazil, a near doubling of production in Argentina, and subdued Chinese demand. Global soybean production in 2023-24 is projected to increase by 5 percent, to a new record. The rise in palm oil prices reflected weakening production in Southeast Asia and declining global stocks. The other foods price index, encompassing sugar, meat, and fruits, fell by 2 percent in 2024Q1 (q/q) but remains 10 percent higher than a year earlier. The quarterly decline was due to a 10 percent fall in sugar prices, an 8 percent drop in orange prices, and a 6 percent decrease in chicken prices, partly offset by a 6 percent rise in beef prices. Sugar prices plummeted by 17 percent in December 2023 (m/m) and remained at that level in 2024Q1, reflecting increased production in Brazil and dry weather that allowed cane processing to continue and sugar exports to leave ports faster than expected.

Outlook

The World Bank's food price index is projected to decrease by 6 percent in 2024 and 4 percent in 2025, with lower prices for grains as well as oils and meals accompanied by price gains for other foods in 2024, followed by broad-based declines in 2025 (figures 8.E and 8.F). The grains price index is expected to fall by 11 percent in 2024 (y/y) and 4 percent in 2025, driven by higher global grain supplies (figure 9.A). In 2024, wheat prices are forecast to decline by 15 percent, reflecting elevated production. In 2025, wheat prices are forecast to edge down by a modest 2 percent as the effects of strong export competition and marginally higher production are tempered by somewhat greater consumption and the lowest end-of-season stocks-to-use ratio in eight years (figures 9.B and 9.C). Global maize production is set to reach an all-time high in the 2023-24 season, primarily reflecting increases in the United States and Argentina of 12 percent and 47 percent (y/y), respectively. Maize prices are expected to decline by 21 percent (y/y) this year, amid the surge in supply. However, given that recent relative price movements and crop rotation preferences have favored soybean production, maize production is envisaged to grow only marginally in 2025, leading to a modest 2 percent price decline in 2025 (figures 9.C and 9.D). Recent policy shifts in the European Union to curb agricultural imports from Ukraine (including maize), while also proposing a €95-per-metric-ton duty on grains from Russia and Belarus, may put upward pressure on EU grain prices and downward pressure on prices in nonEU markets for Black Sea grains. Global rice production in 2023-24 remains flat, with the stock-to-use ratio falling to the lowest level in three years. Due to tight global markets and India's export restrictions, rice prices are forecast to rise by 8 percent (y/y) in 2024. With El Niño conditions expected to diminish by

May 2024, production is set to increase thereafter. This, alongside the assumption that weather-induced trade restrictions will ease next year, underpins a projected 8 percent decline in prices in 2025.

The oils and meals price index is projected to fall by 7 percent (y/y) in 2024 and 5 percent in 2025, due to favorable global supplies. Soybean prices are forecast to decrease by 16 percent in 2024 and 5 percent in 2025, reflecting record-high global production and the highest stock-to-use ratio since 2018. An anticipated increase in harvested area in 2025, driven by the relative attractiveness of soybean over maize production, will further contribute to declining soybean prices. Projected declines in soybean meal prices, by 11 percent in 2024 and 4 percent in 2025, also reflect these positive supply fundamentals. In contrast, soybean oil prices are expected to edge higher by 1 percent in 2024 and 2 percent in 2025, due to higher demand for biodiesel production in Brazil, India, Indonesia, Malaysia, and the United States. Palm oil prices are set to rise by 2 percent in 2024, given weakening production in Southeast Asia and tightening stocks, but to decline by 9 percent in 2025 as supplies improve following the weakening of El Niño.

The price index for other foods is projected to increase by 2 percent (y/y) in 2024 and then fall by 3 percent in 2025. The expected weakening of El Niño in the first half of 2024 should alleviate sugar supply constraints in India and Thailand, the second and third largest sugar exporters globally, resulting in price declines of 3 percent and 8 percent (y/y) in 2024 and 2025, respectively. Orange prices are forecast to rise about 5 percent in 2024, following a 71 percent spike in 2023. The forecast of sustained high prices reflects storm damage and citrus disease in orange-producing states in the United States, coupled with continued drought conditions in Spain, Europe's largest orange producer. Orange prices are projected to decline by 9 percent in 2025 as these factors begin to subside.

Risks

Risks to the agricultural commodity price forecasts are tilted to the upside. Notable upside risks relate to weather, geopolitics, input cost dynamics, and potential maritime chokepoints. However, biofuel policies that are less supportive of prices than currently envisaged pose a downside risk.

Upside risks: Disruptions to grain shipments. In 2023, more than 14 percent of global seaborne grains and oilseeds trade passed through the Suez Canal, a considerably higher share than for crude oil and metals. Recent attacks on commercial vessels in the Red Sea prompted significant rerouting from the Suez Canal to around the Cape of Good Hope. During December and January, an estimated 4.3 million tons of grains and oilseeds were diverted in this manner, mostly affecting U.S. soybean exports and EU wheat exports to Asia. Thus far, however, grain and oilseed prices have not been significantly affected, perhaps partly because container ships originating from the Black Sea region—a major source of grain and oilseeds—have continued to take the Red Sea route. If attacks intensify, prompting vessels from the Black Sea to also divert, substantial delays, increased shipment costs, and higher prices could materialize.

Input costs: Energy and fertilizer costs are forecast to decrease by 3 and 22 percent, respectively, in 2024, with further declines in 2025 (figure 10.C). If these price declines do not materialize—for instance, because of escalating geopolitical tensions that push up energy prices and adversely affect fertilizer production—food prices will likely be higher than forecast. Moreover, fertilizer producers in the Black Sea region, the Middle East, and North Africa heavily rely on the Suez Canal for exports, and this route could become unviable if Red Sea shipping disruptions intensify, raising the cost of transporting fertilizers to end-users.

La Niña: The U.S. National Oceanic and Atmospheric Administration forecasts a weakening of El Niño weather conditions, with an 85 percent chance of transitioning to neutral conditions by April-June 2024. The probability of a subsequent La Niña onset between June and August 2024 has increased to 60 percent. La Niña conditions typically result in wetter than normal conditions in Australia, northern Brazil, India, Indonesia, Malaysia, the Philippines, and Southeastern Africa, while bringing unusually dry weather in the United States Gulf Coast, Southern Brazil, and Argentina. The weakening of El Niño and the likely emergence of La Niña is anticipated to alleviate price pressures on commodities like cocoa, food oils, natural rubber, rice, and sugar in 2025. If these weather forecasts fail to materialize, prices may surpass expectations.

Downside risks

Biofuels: The International Energy Agency predicts a 30 percent increase in biofuel demand from 2023-28 relative to the previous five years. Emerging and developing economies such as Brazil, India, Indonesia, and Malaysia are expected to drive over 60 percent of demand growth through supportive policies promoting biofuel adoption, rising demand for transport fuel, and ample availability of feedstock, even though the majority of current production occurs in advanced economies. The share of biodiesel demand in total palm oil production in Malaysia and Indonesia is projected to rise from 19 percent in 2022 to 30 percent by 2028. Additionally, in the United States, eight midwestern states will be permitted to sell gasoline blended with 15 percent ethanol year-round from April 2025. The forecasts assume that this policy-derived support for biofuel demand will continue. However, there may be downward pressure on prices for grains, vegetable oils, and sugar if such policies do not unfold as planned.

India ranked 3rd in global egg production and produced at least 138.38 billion nos. in 2022-23. Egg production is growing at the rate of 6.8% per annum. India is also the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. India is the 3rd largest fish-producing country, accounting for 8% of the global fish production, and ranks 2nd in aquaculture production. India has access to several natural resources that provides it with a competitive advantage in the food processing sector. Due to its diverse agro-climatic conditions, it has a wide- ranging and large raw material base suitable for food processing industries.

Use of proper equipment can increase farm productivity by up to 30% and reduce the input cost by about 20%. Tractor accounts for most of the farm mechanisation in India. The country is also the largest market in the world for tractors. The pandemic-induced lockdowns resulted in a sharp increase in the share of food in the total expenditure across rural and urban India for all income groups and castes and religions, but the intensity of shifts varied. Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). Moreover, India's foodgrain production touched a record 345.32 million MT in 2021-22. As per the First Advance Estimates for 2023-24 (Kharif only), total foodgrain production in the country is estimated at 148.5 million tonnes.

Factors contributing towards the sharp growth in demand for processed foods include increasing urbanization, increasing disposable incomes, changing spending patterns/ priorities, the emergence of nuclear families and the growing need for convenience foods in dual-income nuclear families.

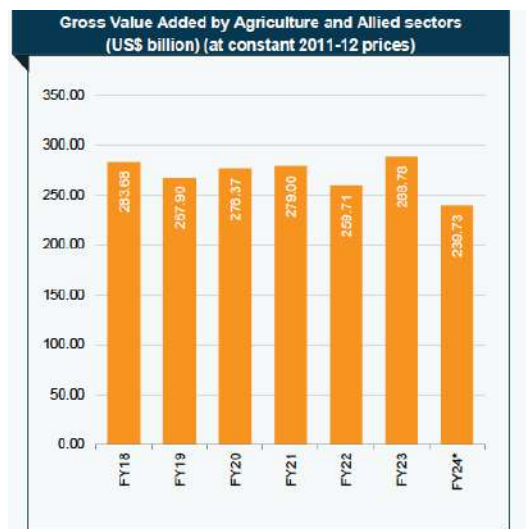

The demand for organic products in the Indian market is growing and is anticipated to rise with a CAGR of 25.25% between 2022-27. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23. India has access to several natural resources that provides it with a competitive advantage in the food processing sector. Due to its diverse agro-climatic conditions, it has a wide-ranging and large raw material base suitable for food processing industries.

Entry of foreign players have been key to sustainable growth in some sectors such as dairy. Indian consumers are rapidly changing their eating habits. Trends indicate a sharp increase in on-the go eating, snacking in between meals, switching to healthier eating alternatives, pre-cooked ready to eat meals and increasing consumption of organic foods. This has led to a host of new opportunities in the consumer foods market for both domestic and international companies to build a stake in this fast-growing processed food market.

Through several Digital Initiatives, such as the National e- Governance Plan in Agriculture (NeGP-A), the construction of Digital Public Infrastructure (DPI), digital registries, etc., the government has taken a number of steps to ensure access to IT across the nation. A new sub-scheme of PM Matsya Sampada Yojana with a targeted investment of Rs. 6,000 crore (US\$ 729 million) to be launched to further enable activities of fishermen, fish vendors, and micro & small enterprises, improve value chain efficiencies and expand the market. The government has proposed developing 100 food streets in 100 districts across India, with the financial help of Rs. 1 crore (US\$ 122,271.30) per food street/district.

There are two major agricultural seasons in India: Kharif and Rabi. Kharif season lasts from April to September (summer) - rice (paddy) is the season's main crop and rabi season lasts from October to March (winter) - wheat is the season's main crop. Monitoring of rabi crop sowing revealed that as of December 9, 2022, the area sown under rabi crops has increased from 457.80 to 526.27 lakh hectares. Out of 68.47 lakh hectares increase in all rabi crops, the increase in wheat area is 51.85 lakh hectares from 203.91 to 255.76 lakh hectares. Rabi crop area has increased by 3.25%, from 697.98 lakh hectares in 2021-22 to 720.68 lakh hectares in 2022-23. This is a 22.71 lakh hectare, a 13.71% increase over the average sown area in 2021-22. As per the First Advance Estimates for 2023-24, rice is estimated at 1,063.13 lakh tonnes during the kharif season. India's agriculture exports touched US\$ 35.18 billion (April-December) in 2023-24. As per the provisional figures released by the Directorate General of Commercial Intelligence and Statistics (DGCI&S), agricultural exports have grown by 19.92% during 2021-22 to touch US\$ 50.21 billion. This remarkable feat has been made possible on the shoulders of several key initiatives taken by the Central government to increase the production of food grains in recent years.

India's agricultural and processed food products exports stood at US\$ 53.12 billion in 2022-23. India's agricultural and processed food products exports stood at US\$ 35.18 billion in 2023-24 (April-December). The exports for principal commodities in 2023-24 (April-December) were the following:

Strategies adopted

Rising business and product innovation

- India's food service market is expected to reach US\$ 79.65 billion by 2028, growing at a CAGR of 11.19% from US\$ 41.1 billion in 2022.
- The government is promoting the use of drones in agriculture by providing financial assistance through the 'Submission on Agriculture Mechanization'.
- Government aims to make India a global hub for 'Shree Anna', the Indian Institute of Millet Research, Hyderabad will be supported as the Centre of Excellence for sharing best practices, research and technologies at the international level.
- National Agriculture Market (eNAM) is a pan-India electronic trading portal which networks the existing APMC mandis to create a unified national market for agricultural commodities. Integration of APMCs across the country through a common online market platform to facilitate pan-India trade in agriculture commodities, providing better price discovery through transparent auction process based on quality of produce along with timely online payment.

Research

- As per the Union Budget 2023-24, government aims to make India a global hub for 'Shree Anna', the Indian Institute of Millet Research, Hyderabad will be supported as the Centre of Excellence for sharing best practices, research and technologies at the international level.
- Agriculture Accelerator Fund to be set-up to encourage agri-startups by young entrepreneurs in rural area.

Low-cost price strategy

- Low-cost price strategy is adopted so as to make the product affordable to consumers by guaranteeing them value for money. For example, to penetrate deeper into the Indian households Kissan adopted a low cost price strategy also known as penetration pricing strategy to make its products affordable and attractive to the consumers by giving them value for money.
- The demand for processed foods in India is constrained by low income and sociocultural factors.
- Government has set up a special fund called the Food Processing Fund (FPF) of approximately US\$ 265 million in the National Bank for Agriculture and Rural Development (NABARD) for extending affordable credit to designated food parks and food processing enterprises in the designated food parks.

Growth drivers of Indian agriculture

Demand-side drivers

- Rapid population expansion in India is the main factor driving the industry.
- Changing lifestyle and food habits due to increased disposable income
- The demand for processed foods in India is constrained by low income and socio-cultural factors.

Supply-side drivers

- According to the Center for Environment and Agriculture (CENTEGRO) and Crop Care Federation of India (CCFI), India can become the 'global agricultural hub' for other countries, which have harsh weather, scarce labour and lands, and are seeking to outsource their agriculture.
- High level of agricultural production - large livestock base, wide variety of crops, inland water bodies and a long coastline, help increase marine production.
- Bringing Green Revolution to Eastern India (BGREI)

Policy support

- A new sub-scheme of PM Matsya Sampada Yojana with targeted investment of Rs. 6,000 crore (US\$ 729 million) to be launched to further enable activities of fishermen, fish vendors, and micro & small enterprises, improve value chain efficiencies, and expand the market.
- Online, Competitive, Transparent Bidding System with 1.74 crore farmers and 2.39 lakh traders put in place under the National Agriculture Market (e-NAM) Scheme.

Institutional credit and investments on a rise

- The performance of the agriculture and allied sector has been buoyant over the past several years, much of which is on account of the measures taken by the government to augment crop and livestock productivity, ensure certainty of returns to the farmers through price support, promote crop diversification, improve market infrastructure through the impetus provided for the setting up of farmer-producer organizations and promotion of investment in infrastructure facilities through the Agriculture Infrastructure Fund.

- Private investment in agriculture increased to 9.3% in 2020-21.
- Institutional Credit to the Agricultural Sector continued to grow to Rs. US\$ 226 billion (18.6 lakh crore) in 2021-22.

- Free foodgrains to about 81.4 crore beneficiaries under the National Food Security Act for one year from January 1, 2023.
- The Centre has granted permission to five private companies to conduct cluster farming of specified horticulture crops on approximately 50,000 hectares on a trial basis, with a total investment of US\$ 91.75 million (Rs. 750 crore). The five companies chosen through a bidding process for the pilot cluster farming program are Prasad Seeds, FIL Industries, Sahyadri Farms, Meghalaya Basin Management Agency.
- 27,003 Loans have been sanctioned in the country under credit linked subsidy component of the PM Formalisation of Micro Food Processing Enterprises Scheme (PMFME).

Rising income and growing middle class to drive demand for processed food

- Strong growth in per capita income has resulted in greater demand for food items.
- Per capita GDP of India is expected to reach US\$ 3,277 in 2024 from US\$ 2,036 in 2018.
- India's food processing sector has been one of the key sectors, which is growing due to its response to the changing demographics and lifestyle, affordable workforce availability, free availability of raw materials, and is boosted by growth in export opportunities and government advocacy to develop food manufacturing. Since India's processing sector is the world's biggest with to food production, supply and processing, backed by conducive conditions, its output can touch US\$ 535 billion by 2025-26, while generating jobs to the tune of 9 million by 2024. Hence, other than the processing industry, packaged and ready-to-eat (RTE) food too is poised to see a huge boom.
- The growth in these sectors are also propelled by the pandemic, hike in expendable income leading to increasing appetites for discretionary spends on branded items including processed food items, a rejuvenated retail sector and state sponsorship.

Revenue Model

In respect of our consultancy services, we charge a yearly margin of 1% or 2% on the profit earned by the client through the sale of commodities. Further, in respect of our trading model, we earn profit from the margin between the price of the commodities purchased and sold by us.

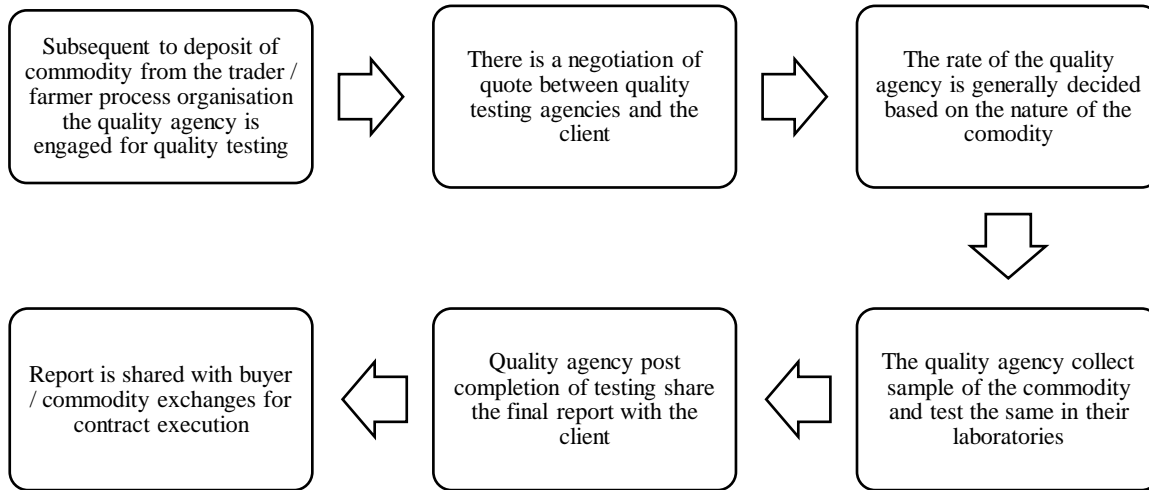

Quality testing Services

Prior to execution of contract, the seller needs to ensure that the quality of the commodity is in line with the quality requirement prescribed by the buyer or the commodity exchange. Prior to procurement of the commodity, our Company ensures that we engage quality testing agencies, in order to obtain quality testing reports for the commodity purchased from the traders and other farmer produce organizations. The amount charged by the quality testing agencies for conducting tests depends on the commodity. For instance, the charges for oil and other liquid commodities is higher as compared to other solid commodities.

Key role of quality testing agencies is to inspect the commodity deposited by the seller by taking random samples from the stock, undertaking physical as well as chemical based sampling of each lots and providing quality certificates of the sample drawn by their team. These quality testing agencies have their own private labs, where they conduct tests on the

commodities of the seller. This final quality report is issued post completion of testing and these reports are submitted to the buyer/ on our platform prior to executing contracts for purchase of commodity.

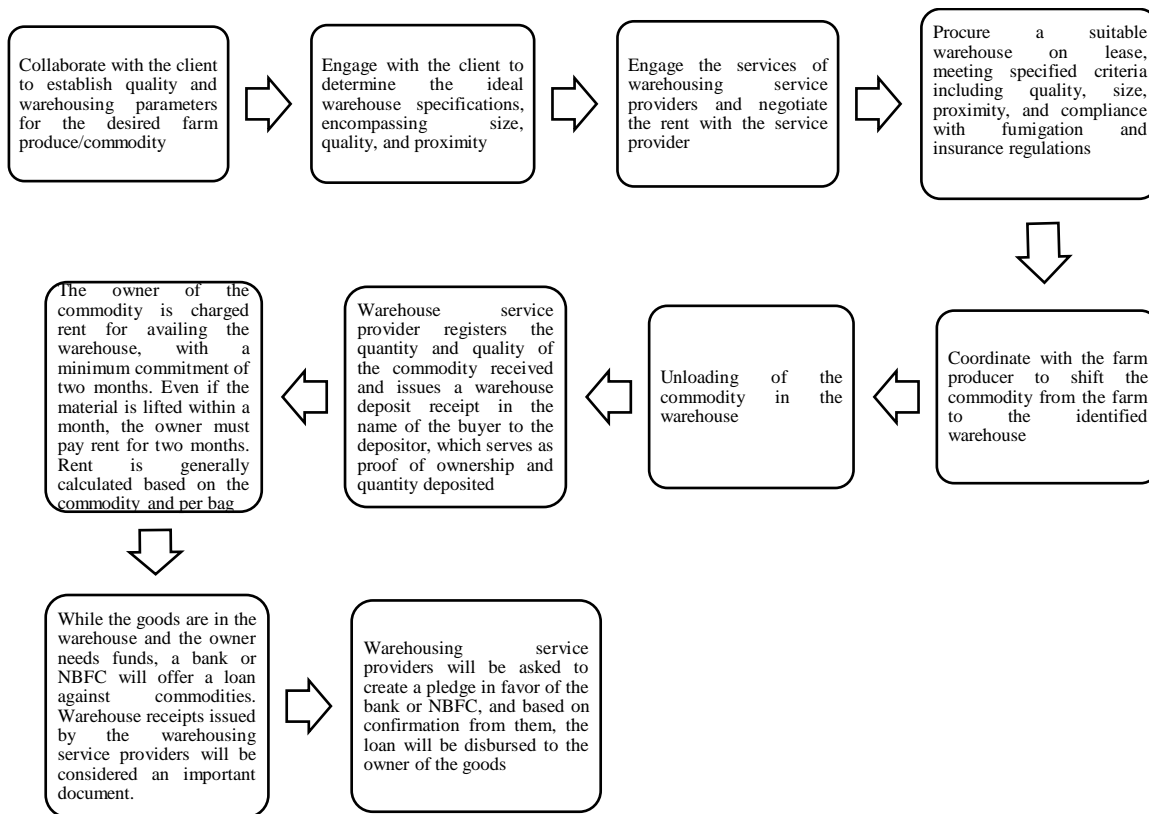

A brief process flowchart of our quality testing services has been provided below:

Warehousing Services

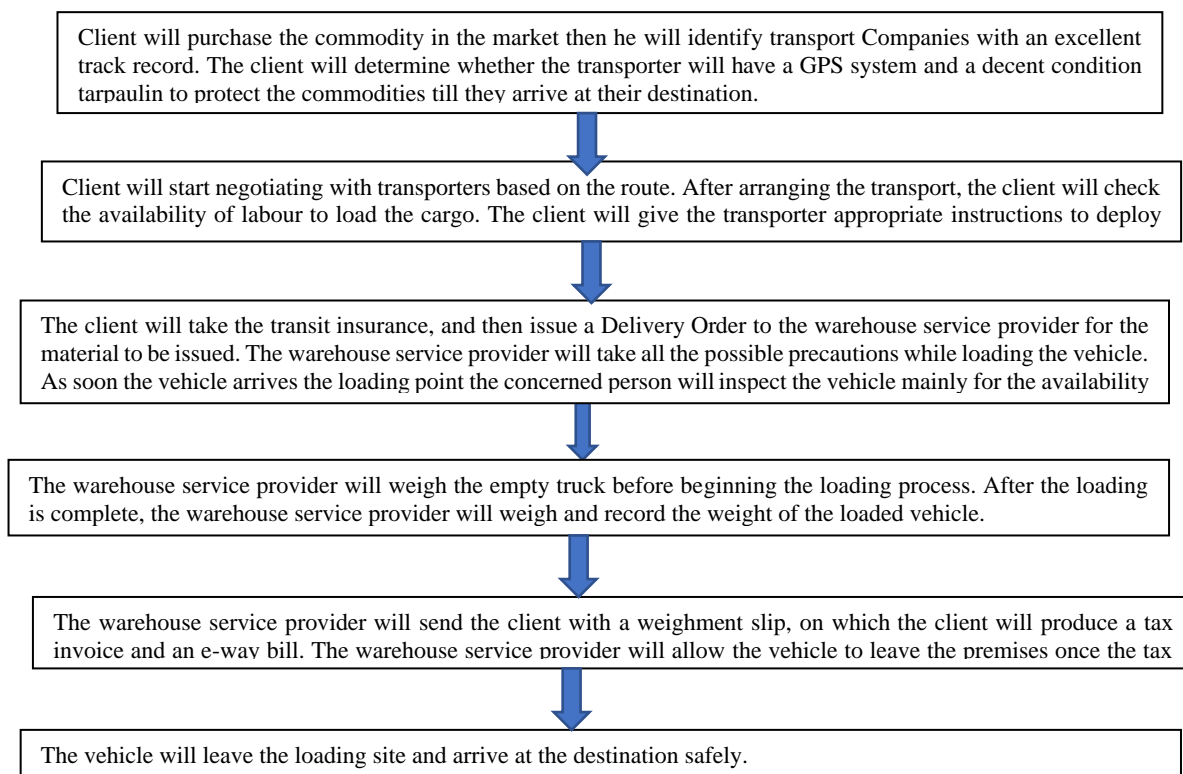

As part of our cash and carry services, we offer warehousing services, wherein we connect our customers with warehouse service providers, for storing their products until the execution of their contract. Our Company has cultivated informal arrangements with warehousing service providers, as per which we connect the service providers with our customers in lieu of a certain percentage of pre-decided commission.

A brief process flowchart of our warehousing services has been provided below:

Logistical Services

As part of our cash and carry services, we offer logistical services, wherein we connect our customers with transport service providers, for transporting their commodities from the traders and farmer procurement agencies to warehouses and thereafter from warehouses to seller for contract execution. A brief process flowchart of our logistical services has been provided below:

OUR STRENGTHS

Integrated service portfolio with in-house technology solutions

We offer integrated cash and carry services, through digital and offline mediums across the agri-commodity value chain. We offer a bouquet of specialized services, including but not limited to, commodity procurement/selling, price negotiation and contract execution, quality testing, warehouse management, financing, insurance and transportation and sale execution (either to end user or through commodity exchanges).

We have created an online as well as offline presence. We have developed an interactive platform, wherein intermediaries from diverse locations can procure or sell agri-commodities. Presently, we have completed phase one of development of our technology platform, wherein we operate our platform for a limited number of users which primarily include commodity buyers and sellers and farmer producer organizations. As part of our online services, we offer a limited number of commodities through our platform which include, kabuli chana, inshell almond(imported), bengal gram, urad(black matpe), toor, wheat, rm seed, coriander, castor seed, cotton bales, maize, soyabean, soyabean meal, turmeric, chana dal, guar gum, guar seed, cotton seed oil cake, barley,, jeera, moong dal, moth, bajra,, paddy, pegion peas,, black pepper,, red chilli, mentha oil, rapeseed meal, sufi billet steel/steel ingot, sugar and service customers who place orders from various locations. In order to ensure that reliable and trustworthy intermediaries join our platform, we have created a registration process, wherein our teams verify the credentials and credit worthiness of an intermediaries before onboarding on our platform and issuing login details. We also have set up auto transaction limit, which ensures a low risk of transaction failure and breach of contracts.

Our platform connects buyers with sellers and traders and therefore provides them information and access to the procurement needs and price range of our customers in just a few clicks, thereby reducing the need for in-person interactions as the entire transaction process can be done on the platform. Through our digital platform accessed by numerous consumers, we believe that we will be able to gather unique consumer insights, including warehousing, quality, insurance and commodity need gaps for specific segments, that can be met efficiently and scaled over time.

As part of phase two of development of our technology platform, we intend to (i) further develop our platform by adding additional commodities for our customers and increasing the locations where we shall be offering services to our customers; and (ii) digitalising the remaining functions of our Company, in respect of quality management, warehouse management, insurance, warehousing finance and logistics. We intend to utilise a portion of the Net Proceeds towards undertaking investment in our technology infrastructure and human resources towards development of the commodity platform of our Company. For further details, please see the chapter titled “*Objects of the Issue*” on page 81 of this Draft Red Herring Prospectus.

As part of our offline service offerings, we have cultivated long standing relationships with traders and contract merchants in Mandis located across Rajasthan, Madhya Pradesh, Gujarat, Maharashtra, Uttar Pradesh and Telangana, who help us procure high quality commodity, in requisite quantities and at competitive prices. We have also stationed our employees in all the above locations for ensuring quality procurement and execution of contract through third parties such as warehouse service partners, quality testing agencies, etc. Our tie ups with warehousing service partners, insurance agencies and financial institutions, enable us in offering quality warehousing solutions, full cover for the commodities stored in the warehouse, and reliable warehousing receipt finance.

Asset-light business model.

We have adopted what we believe to be a scalable, asset-light and less capital-intensive business model, wherein we have outsourced our key business operations, including quality testing, warehousing, insurance and financing. We believe that this asset light business model, enables us to direct all our efforts towards marketing, technical advancement and increasing our customer base. We have entered into informal arrangements with third party agencies for offering warehousing, quality, insurance and financing solutions to our customers. Our third party intermediaries execute key functions on our behalf and also provide us a commission for connecting them with our customers. The expense towards availing services from third party intermediaries is borne by our customers, thereby increasing our profit margin and reducing our working capital expenditure. Our asset light model reduces the direct responsibility of our Company and enables us to focus on marketing and sales. We believe that through our asset light model, we have significantly reduced our cost of investment and running our business, by outsourcing key responsibilities and functions and thereby have achieved greater flexibility to scale up our business faster than other asset-heavy companies. This quick scalability gives us a definite edge over other service providers in the market.

Collaborative warehousing, insurance, finance and logistical counterparties

As part of our offline model, we have informal arrangements with WSPs who are registered with the commodity exchanges as an approved WSP. As part of our warehousing solutions, we offer both registered warehouses and unregistered warehouses, to our customers for storing the commodities procured. We ensure that the unregistered warehouses are also obtained from approved WSP to ensure optimum quality of our warehousing solutions. In compliance with the guideline of the commodity exchanges, we also guide our customers for securing the commodity by way of an insurance. We have informal tie ups with various institutions who offer insurance services and by connecting them with our customers, we help our customers in obtaining a full cover insurance equalling the value of goods stored with the WSP against all potential perils relevant to the commodities. We have also cultivated informal tie ups with intermediaries such as third party quality testing agencies and logistics service providers, to enable our clients in executing the contracts with the commodity exchanges. We provide our warehousing, insurance, finance and logistical counterparties with access to the large consumer bases to enhance their sales, and in lieu of this, they offer us a commission at a pre-decided rate. Our arrangements with diverse counterparties makes our offerings integrated and result oriented.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our financial condition and results of operations are affected by numerous factors and uncertainties, including those discussed in the section titled ‘Risk Factors’ on page 25 of this Draft Red Herring Prospectus. The following is a discussion of certain factors that have had, and we expect will continue to have, a significant effect on our financial condition and results of operations:

- Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition. Further, we generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.
- Our business is subject to seasonal and price volatility of commodities in the physical market as well as commodity exchanges, which may contribute to fluctuations in our results of operations and financial condition.
- We are involved in high volume - low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.
- We have a limited experience of running our technology platform, as a result of which we may not be able to compete successfully, and it may be difficult to evaluate our business and future operating results on the basis of our past performance.
- A significant portion of services forming part of our cash and carry model are executed by third parties, with which we do not have any formal arrangements.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure

to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III/T+3: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023 vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular. The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to *inter-alia*, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, *inter-alia* with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
