ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “Civil Procedure Code”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

1. Summary of Industry

Non-Banking Financial Institutions form an integral part of the Indian financial ecosystem. They provide underbanked/unbanked individuals and MSMEs an opportunity to be a part of the financial mainstream. They have been successful in bridging the credit gap for the entire spectrum of customers ranging from high ticket structured loans to corporates/HNIs to microfinance customers, due to their higher risk underwriting capacity, superior credit assessment skills and deep understanding of customers. They have emerged as a vehicle for financing business activities that Banks neglected due to regulatory restrictions such as credit exposure constraints and sector concentration norms.

NBFC is a Financial Institution that is into Lending or Investment or collecting monies under any scheme or arrangement but does not include any institutions which carry on its principal business as agriculture activity, industrial activity, trading and purchase or sale of immovable properties. A company that carries on the business of accepting deposits as its principal business is also an NBFC.

India has a diversified financial sector undergoing rapid expansion, both in terms of the strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds, and other smaller financial entities. The banking regulator has allowed new entities such as payments banks to be created recently thereby adding to the types of entities operating in the sector. INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. ***As an NBFC, we are subject to periodic inspections by the RBI. Non-compliance with observations made by RBI during these inspections could expose us to penalties and restrictions***

Under section 45N of the Reserve Bank of India, 1934 (“RBI Act”) we are subject to periodic inspections by the RBI to verify correctness or completeness of any statement, information or particulars furnished to the RBI for the purpose of obtaining any information or particulars which our Company has failed to furnish on being called upon to do so. While we may respond to RBI and address such observations; there can be no assurance that the RBI will not make similar or other observations in the future. If we are unable to resolve such deficiencies to RBI’s satisfaction, our ability to conduct our business may be adversely affected. Imposition of any penalty or adverse findings by the RBI during the ongoing or any future inspections may have an adverse impact on our business prospects, financial condition and results of operations. NBFCs in India are subject to strict regulation and supervision by the RBI. We require certain approvals, licenses, registrations and permissions for operating our business. Such approvals, licenses, registrations and permissions must be maintained / renewed over time and we may have to comply with certain conditions in relation to these approvals. Moreover, the applicable requirements may change from time to time. We are required to obtain and maintain a license for carrying on business as an NBFC. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. RBI has the authority to change these norms/ criteria as and when required. Inability to meet the prescribed norms/ criteria, can adversely affect the operations and profitability of our Company.

2. ***We operate in a highly competitive industry and our inability to compete effectively may adversely affect our business.***

We operate in a highly competitive industry. Given the diversity of our businesses, and the products and services offered by us, we face competition from the full spectrum of public sector banks, private sector banks (including foreign banks), financial institutions, captive finance affiliates of players in various industries, small finance banks and other NBFCs who are active in SME, retail and individual lending. Many of our competitors may have greater resources than we do, may be larger in terms of business volume and may have significantly lower cost of funds compared to us. They may also have greater geographical reach, long-standing partnerships and may offer their customers other forms of financing that we may not be able to provide. Competition in our industry depends on, amongst others, the ongoing evolution of government and regulatory policies, the entry of new participants and the extent to which there is consolidation among banks and financial institutions in India. We cannot assure you that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in our increasingly competitive industry and our inability to compete effectively may adversely affect our business.

3. ***Our business will require substantial funds, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.***

Our liquidity and profitability are, in large part, dependent upon our timely access to, and costs associated with raising capital including both debt and equity. Our business depends and will continue to depend on our ability to access diversified low-cost funding sources. As a financial services company, we face certain additional regulatory restrictions on our ability to obtain financing from banks. Further, under Indian Law, foreign investors are subject to investment restrictions that may limit our ability to attract foreign investors or capital from overseas investors.

Pursuing our growth strategy and introducing new product offerings to our customers will have an impact on our long-term capital requirements. With the growth of our business, we may be increasingly reliant on funding from debt capital markets. The market for such funds is competitive and our ability to obtain funds at competitive rates will depend on various factors. If we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors, including the regulatory environment and policy initiatives in India, lack of liquidity in the market, developments in the international markets affecting the Indian economy, investors’ and/or lenders’ perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition. If we are unable to obtain adequate financing or financing on terms

satisfactory to us and in a timely manner, our ability to grow or support our business and to respond to business challenges could be limited and our business prospects, financial condition and results of operations would be materially and adversely affected.

- 4. We are affected by volatility in interest rates for both our lending and fund raisings operations, which could cause our net interest income to decline and adversely affect our results of operations and profitability.***

A significant component of our revenue is the interest on loans and other financing activity we receive from the loans we disburse. Our net interest margins are affected by any volatility in interest rates in our lending operations. Interest rates are highly sensitive to many factors beyond our control, including competition from other banks and NBFCs, the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors, which have historically generated a relatively high degree of volatility in interest rates in India. Persistently high inflation in India may discourage the Government from implementing policies that would cause interest rates to decrease. Moreover, if there is an increase in the interest rates we pay on our borrowings that we are unable to pass to our customers, we may find it difficult to compete with our competitors, who may have access to funds at a lower cost or lower cost deposits. To the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than lenders that borrow only at fixed interest rates. Further, our ability to pass on any increase in interest rates to borrowers may also be constrained by regulations implemented by the Government or the RBI. In a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, it could lead to a reduction in our net interest income and net interest margin.

- 5. We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.***

In deciding whether to extend credit or enter into other transactions with customers, for certain key elements of the credit assessment process, we rely on information furnished to us by or on behalf of customers (including in relation to their financial transactions and past credit history). We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given, may affect our judgement of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

- 6. High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.***

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

7. *We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans.*

The value of the security provided to us, may be subject to reduction in value on account of other extraneous reasons. Consequently, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs recoverable from such customers.

Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such pledges and if at the time of such enforcement, due to adverse market conditions, the market value of the pledged securities have fallen to a level where we are unable to recover the monies lent by us, along with interest accrued thereon and associated costs, the results of our operations would be adversely affected. In case of any shortfall in margins in connection with the securities pledged as collaterals, we typically call upon the relevant customer to provide further collateral to make up for the deficit in such margins. Furthermore, enforcing our legal rights by litigating against defaulting customers is generally a slow and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

8. *Our Company's inability to obtain, renew or maintain the statutory and regulatory permits and approvals which are required to operate its existing or future businesses may have a material adverse effect on its business, financial condition, cash flows and results of operations.*

NBFCs in India are subject to regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as an NBFC with the RBI, we are also required to comply with certain other regulatory requirements for its business imposed by the RBI. In the future, there could be circumstances where our Company may be required to renew applicable permits and approvals and obtain new permits and approvals for its current and any proposed operations or in the event of a change in applicable law and regulations. There can be no assurance that RBI or other relevant authorities will issue any such permits or approvals in the time-frame anticipated by our Company, or at all. In addition, we require several registrations to operate our branches in the ordinary course of business. These registrations include those required to be obtained or maintained under applicable legislations governing shops and establishments, professional tax, GST registrations etc. Some of these approvals may have expired in the ordinary course, and our Company has either applied, or is in the process of applying for renewals of them. Failure by our Company to renew, maintain or obtain the required permits or approvals may result in an interruption of its operations and may have a material adverse effect on its business, financial condition, cash flows and results of operation.

9. *Our borrowers may transfer loan balances to other banks or financial institutions, resulting in a loss of expected interest income expected from such loans.*

If interest rates rise, borrowers with variable interest rates on their loans are exposed to increased equated monthly instalments ("EMIs") when the loans' interest rate adjusts upward. Such borrowers may seek to refinance their loans through balance transfer to other banks and financial institutions to avoid increased EMIs that result from an upwards adjustment of the loans' interest rate. Even if interest rates do not increase, our borrowers may seek to transfer loans to banks or other financial institutions that offer lower interest rates.

Loan balance transfers result in a loss of interest income expected from such loans over the course of their tenure. All NBFCs and HFCs are prohibited from charging pre-payment penalties on any floating rate term loan sanctioned for purposes other than business to individual borrowers. Even where we are allowed to charge a prepayment penalty, the amount of such penalty will not make up for all of the loss of interest income expected from such loans. Some of our borrowers may be able to find balance transfer options at comparably lower interest rates or other financing alternatives, which could have an adverse effect on our business, results of operations and financial condition.

10. *We may experience difficulties in expanding our products.*

Expanding our products portfolio with new or existing products can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and

infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high -risk credit and impose significant costs on us.

11. *We may experience difficulties in expanding our business into new regions and markets in India*

Historically, our distribution networks is concentrated in New Delhi. As part of our growth strategy, we strive to evaluate attractive growth opportunities to expand our business into new regions and markets in India. Factors such as competition, culture, regulatory regimes, business practices & customs and customer requirements in these new markets may differ from those in our current markets and our experience in our current markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete with other banks and financial institutions that already have a presence in those geographies and markets and are therefore more familiar with local regulations, business practices and customs and have stronger relationships with customers. Our business may be exposed to various additional challenges including obtaining necessary governmental approvals, successfully gauging market conditions in local markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions and results of operations.

12. *We are exposed to operational and credit risks which may result in NPAs, and we may be unable to control or reduce the level of NPAs in our portfolio.*

Our Company's inability to control the number and value of its NPAs may lead to deterioration of the quality of its loan portfolio and may adversely impact its business. Further, if our customers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected.

13. *We may face asset-liability mismatches, which could affect our liquidity and consequently may adversely affect our operations and profitability.*

Assets and liability mismatch ("ALM") represents a situation when financial terms of an institution's assets and liabilities do not match. ALM is a key financial parameter indicative of an NBFC's performance. We cannot assure you that we will be able to maintain a positive ALM always. We may rely on funding options with short term maturity periods for extending long term loans, which may lead to a negative ALM. Further, mismatches between our assets and liabilities are compounded in case of prepayment of financing facilities we grant to customers. Any mismatch in our ALM, may lead to a liquidity risk and have an adverse effect on our business prospects, financial condition, results of operations and profitability.

14. *The novel coronavirus pandemic (COVID-19 Pandemic) outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.*

The rapid outbreak of the COVID-19 Pandemic, resulted in an unpredictable chain of events across the globe. With reduced production and consumption, every economy witnessed a fiscal crunch like never before. The pandemic shook the Indian economy, which was already under the effects of demonetisation and GST enforcement. As Covid-19 Pandemic swiftly made its way into the nation, the Indian Government imposed a strict nationwide lockdown. Trade and travel restrictions along with shutdown of business activities led to a GDP contraction of 23.9%.

The financial year 2020-21 began with ongoing COVID-19 Pandemic that led to nationwide lockdown. The lockdown was relaxed in a phased manner depending upon the severity and magnitude of the spread of the pandemic. The cases started declining after reaching peak levels in September 2020. With revival of economic activities due to easing of lockdown, economy rebounded. However, the resurgence of COVID-19 Pandemic impacted the nascent economic revival that was taking shape. The most vulnerable category of

borrowers are individual borrowers, small businesses and MSMEs.

Our Company also lends to MSMEs. In order to mitigate the stress caused by the Covid-19 Pandemic on several sectors across the country, the Government has announced an Emergency Credit Line Guarantee Scheme ("ECLGS"). The ECLGS aims to provide 100 percent guaranteed coverage to the banks, non-banking financial institutions (NBFCs) and other lending institutions in order to enable them to extend emergency credit to business entities that have suffered due to the COVID-19 Pandemic and are struggling to meet their working capital requirements. The scheme aimed to provide Rs 3 lakh crore worth of collateral-free, government-guaranteed loans to micro, small and medium enterprises (MSMEs) across India to mitigate the distress caused by the coronavirus-induced lockdown.

RBI took several standard and innovative measures to ensure liquidity in the system. RBI permitted lending institutions to provide relief to the borrowers for a period of six months starting from 1st March 2020 to 31st August 2020 from EMI payments and working capital interest payments. It also announced relief measures including new restructuring guidelines to retain loans from banks and NBFCs' to such qualifying loans classified as standard within the regulatory framework. RBI also declared Resolution Framework for COVID-19 Pandemic related stress through which a window to enable lenders to implement a resolution plan in respect of eligible corporate exposures without change in ownership, and personal loans, while classifying such exposures as Standard, subject to specified conditions. Reserve Bank of India vide its circular dated 7th April 2021 instructed all lending institutions to refund / adjust 'interest on interest' to all borrowers including those who had availed of working capital facilities during the moratorium period, irrespective of whether moratorium had been fully or partially availed or not availed.

Given that the COVID -19 Pandemic and its impact on the Company, the actual impact on our Company's loans and advances will also depend on future developments, including, among other things, any new information concerning the severity of the COVID -19 Pandemic and any action to contain its spread or mitigate its impact. While, our Company continue to monitor the developments of the COVID-19 Pandemic situation closely, assess and respond proactively to minimize any adverse impacts on the financial position, cash flows and operating results of our Company, it is possible that the Company's business, financial condition and results of operations could be adversely affected due to the COVID-19 Pandemic. If the COVID-19 Pandemic situation persists or worsens, it may adversely impact our Company's business and the financial condition.

As these are unforeseen circumstances, it may give rise to risks that we may not have anticipated. If the outbreak of any of these pandemic or other severe pandemic, continues for an extended period, occur again and/or increases in severity, it could have an adverse effect on economic activity worldwide, including India, and could materially and adversely affect our business, cash flows, financial condition and results of operations.

15. *Our indebtedness and the conditions and restrictions imposed by our financing agreements could restrict our ability to conduct our business and operations in the manner we desire.*

We may incur additional indebtedness in the future. Many of our financing agreements include various restrictive conditions and covenants restricting certain corporate actions, and our Company may be required to take the prior approval of the lender before carrying out such activities. Our indebtedness could have several important consequences, including our cash flows being used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund our working capital, capital expenditures and other general corporate requirements. Moreover, our ability to obtain additional financing or renewal of existing facilities, in the future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates. There could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements and we may be more vulnerable to economic downturns, which may limit our ability to withstand competitive pressures and may reduce our flexibility in responding to changing business, regulatory and economic conditions.

- 16. *Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance and results of operations.***

We are dedicated to earning and maintaining the trust and confidence of our customers and we believe that the good reputation is essential to our business. The reputation of our Company could be adversely affected by any threatened and/or legal proceedings and/or any negative publicity or news articles in connection with our Company. As such, any damage to our reputation could substantially impair our ability to maintain or grow our business. If we fail to maintain brand recognition with our target customers due to any issues with our product offerings, a deterioration in service quality, or otherwise, declines the our market perception and customer acceptance of our brands may also decline.

- 17. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.***

Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control including a disruption of electrical or communications services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

- 18. *If we are unable to comply with the capital adequacy requirements stipulated by the RBI in connection with our lending business, our business, results of operations and cash flows may be materially and adversely affected.***

Our lending business, is subject to various regulations relating to the capital adequacy of NBFCs, which determine the minimum amount of capital we are required to maintain. There can be no assurance that we will be able to maintain CRAR within the regulatory requirements. Further, as we grow our lending business loan portfolio, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios with respect to such business. There can be no assurance that we will be able to raise adequate additional capital in the future on favourable terms, or at all. This could result in noncompliance with applicable capital adequacy ratios, which could have a material adverse effect on our business, results of operations and cash flows. Also, there is no assurance that RBI will not take any action for breaches in capital adequacy norms by our Company in the future. This could materially adversely affect our business, prospects, results of operations, financial condition and cash flows and could impair our ability to continue current operations and in extreme case, may lead to suspension/ cancellation/ withdrawal of our license to operate as an NBFC.

- 19. *Our measures to prevent money laundering may not be completely effective and we may be subject to scrutiny and penalties by the RBI for failure to implement effective measures.***

Our Company is required to comply with applicable anti-money-laundering and anti-terrorism laws and other regulations in India. Our measures to prevent money laundering as required by the RBI and other KYC compliance applicable in India, including the Reserve Bank of India (Know Your Customer) Master Directions, 2016 dated February 25, 2016, as amended ("KYC Directions") and the adoption of anti-money laundering policies and compliance procedures may not be completely effective. In the event, if any regulatory authorities believes that we are not complying with required money laundering compliances and/or KYC Compliances, there may be civil and criminal penalties for non-compliance and our business and results of operations could be adversely affected.

- 20. *Logo used by us are currently not registered in the name of our Company. The logo is registered trademark in the name of our Subsidiary Company i.e. Advik Optoelectronics Limited. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.***

Our logo is registered trademark under the provisions of Trademark Act, 1999 in the name of our Subsidiary Company, Advik Optoelectronics Limited and therefore may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. Our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key operations personnel, developing managerial experience to address emerging challenges and ensuring a high standard of client service. - 24. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters' shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

25. *We do not own registered office which is used by us currently.*

Our registered office is owned by Mr. Nand Kishore Garg (member of the Promoters' Group) father of Mr. Vikas Garg (Director and Promoter) He had, vide letter dated April 15, 2023 granted their no objection to Company for use the said office premises, as our Registered Office.

In the event, the permission to use under which we occupy the aforementioned premises or certain terms and conditions that are unfavourable to us are imposed on us in relation to the afore referred to premises, or if we are otherwise unable to occupy such premises, we may suffer a disruption in our operations, which could have an adverse effect on our business and financial results.

We have entered into various transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties.

27. *The new bankruptcy code in India may affect our rights to recover loans from borrowers.*

The Insolvency and Bankruptcy Code, 2016 ("**Bankruptcy Code**") was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision, and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Bankruptcy Code provides a 180-day timeline which may be extended by 90 days when dealing with insolvency resolution applications. Subsequently, the insolvency resolution plan prepared by the insolvency professionals has to be approved by 66% of voting share of financial creditors, which requires sanction by the adjudicating authority and, if rejected, the adjudicating authority will pass an order for liquidation. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it. In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor's assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

Further, the GoI vide notification dated March 24, 2020 ("**Notification**") has amended section 4 of the Bankruptcy Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, GoI has increased the minimum amount of default under the insolvency matters from ₹1,00,000 to ₹1,00,00,000. Therefore the ability of our Company to initiate insolvency proceedings against the defaulters where the amount of default in an insolvency matter is less the ₹1,00,00,000 may impact the recovery of outstanding loans and profitability of our Company.

28. *The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.*

29. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled "Objects of the Issue".*

As the Issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same.

30. *As the Equity Shares of our Company are listed on BSE, our Company is subject to certain obligations and reporting requirements under SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us/our promoter liable to prosecution and/or penalties.*

Our Company is subject to the obligations and reporting requirements under SEBI Listing Regulations. In the past, our Company had not complied with certain provisions of the SEBI Listing Regulations. Though our Company endeavours to comply with all such obligations/reporting requirements, there have been certain instances of non-compliance and delays in complying with such obligations/reporting requirements. Any such delays or non-compliance would render our Company to prosecution and/or penalties. Although our Company have not received any further communication from the Stock Exchange or any authority in this regard, there could be a possibility that penalties may be levied against our Company for certain instances of non-compliance and delays in complying with such obligations/reporting requirements.

31. *In the past, there have been instances of delayed or erroneous filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company and our Subsidiaries.*

In the past, there have been certain instances of delay in filing of statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company and our Subsidiaries.

No show cause notice in respect to the above has been received by our Company or our Subsidiaries till date and except as stated in this Draft Letter of Offer, no penalty or fine has been imposed by any regulatory authority in respect to the same. The occurrence of instances of delayed or erroneous filings in future may impact our results of operations and financial position.

32. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

33. *We have not commissioned an industry report for the disclosures made in the chapter titled "Industry Overview" and made disclosures on the basis of the data available on the internet and such third-party data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled "Industry Overview" of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

Issue Specific Risks

34. *We will not distribute this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.*

In accordance with the SEBI ICDR Regulations and SEBI Rights Issue Circulars our Company will send, only through email, this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

35. *SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and May 19, 2022 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI in 2020. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020 and January 19, 2021, April 22, 2021 and May 19, 2022, as applicable (“**SEBI Rights Issue Circular**”) and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "*Terms of the Issue*" on page 199.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialized form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise of Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

36. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholder") may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

37. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see "Terms of the Issue" on page 199.

38. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

39. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

40. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline

41. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

42. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

43. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

44. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

45. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

46. ***Investors will not have the option of getting the allotment of Equity Shares in physical form.***

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "Terms of the Issue" on page 199. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

47. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

External Risk Factors

48. ***Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Summary statements of assets and liabilities as at March 31, 2022 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our restated financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

49. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

50. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

51. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable

income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- The General Anti Avoidance Rules (“GAAR”) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

52. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity

disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

53. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

54. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

55. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

56. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2023 (“Budget 2023”), pursuant to which the Finance Bill 2023 (defined below) has proposed various amendments which will only come into effect upon receipt of Presidential assent to the bill and notification in requisite acts. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

There can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations in connection with GST. While we are and will comply with the GST rules and regulations, any failure to comply with the same may result in noncompliance with the GST and may adversely affect our business and results of operations. The GoI announced the union budget for fiscal year 2023, following which the Finance Bill, 2022 was introduced in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill 2022 received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 (“Finance Act 2022”). We cannot predict whether the amendments made and yet to be notified pursuant to the Finance Act 2022 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Any changes in the Finance Act 2022 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as “gig workers” and “platform workers” and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or

a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future

57. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concerns regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

58. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

59. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

GOLBAL ECONOMY

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia's invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks' generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist.

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2). Russia's invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID-19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperilled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions.

Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID-19 in the second quarter.

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geo-economic fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

Inflation Is Declining with Rapid Rate Rises but Remains Elevated amid Financial Sector Stress

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline. To dampen demand and reduce underlying (core) inflation, the lion's share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis. This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries. Inflation excluding volatile food and energy prices has been declining at a three-month rate—although at a slower pace than headline inflation—in most (though not all) major economies since mid-2022.

Even so, both headline and core inflation rates remain at about double their pre-2021 levels on average and far above target among almost all inflation-targeting countries. Moreover, differences across economies reflect their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched.

The effects of earlier cost shocks and historically tight labor markets are also translating into more persistent underlying price pressures and stickier inflation. The labor market tightness in part reflects a slow post-pandemic recovery in labor supply, with, in particular, fewer older workers participating in the labor force (Duval and others 2022). The ratios of job openings to the number of people unemployed in the United States and the euro area at the end of 2022 were at their highest levels in decades. At the same time, the cost pressures from wages have so far remained contained despite the tightness of labor markets, with no signs of a wage-price spiral dynamic—in which both wages and prices accelerate in tandem for a sustained period—taking hold. In fact, real wage growth in advanced economies has been lower than it was at the end of 2021, unlike what took place in most of the earlier historical episodes with circumstances similar to those prevailing in 2021, when prices were accelerating and real wage growth was declining, on average.

Inflation expectations have so far remained anchored, with professional forecasters maintaining their five-year ahead projected inflation rates near their pre-pandemic levels. To ensure this remains the case, major central banks have generally stayed firm in their communications about the need for a restrictive monetary policy stance, signaling that interest rates will stay higher for longer than previously expected to address sticky inflation.

Figure 1.3. Inflation Turning Down or Plateauing?
(Percent, three-month moving average; SAAR)

Indebtedness Staying High

As a result of the pandemic and economic upheaval over the past three years, private and public debt have reached levels not seen in decades in most economies and remain high, despite their fall in 2021–22 on the back of the economic rebound from COVID-19 and the rise in inflation. Monetary policy tightening—particularly by major advanced economies—has led to sharp increases in borrowing costs, raising concerns about the sustainability of some economies’ debts. Among the group of emerging market and developing economies, the average level and distribution of sovereign spreads increased markedly in the summer of 2022, before coming down in early 2023. The effects of the latest financial market turmoil on emerging market and developing economy sovereign spreads have been limited so far, but there is a tangible risk of a surprise increase in coming months should global financial conditions tighten further. The share of economies at high risk of debt distress remains high in historical context, leaving many of them susceptible to unfavorable fiscal shocks in the absence of policy actions.

Feeble and Uneven Growth

Baseline Scenario

The baseline forecast is for global output growth, estimated at 3.4 percent in 2022, to fall to 2.8 percent in 2023, 0.1 percentage point lower than predicted in the January 2023 WEO Update (Table 1.1), before rising to 3.0 percent in 2024. This forecast for the coming years is well below what was expected before the onset of the adverse shocks since early 2022. Compared with the January 2022 WEO Update forecast, global growth in 2023 is 1.0 percentage point lower, and this growth gap is expected to close only gradually in the coming two years.

The baseline prognosis is also weak by historical standards. During the two pre-pandemic decades (2000–09 and 2010–19), world growth averaged 3.9 and 3.7 percent a year, respectively.

For advanced economies, growth is projected to decline by half in 2023 to 1.3 percent, before rising to 1.4 percent in 2024. Although the forecast for 2023 is modestly higher (by 0.1 percentage point) than in the January 2023 WEO Update, it is well below the 2.6 percent forecast of January 2022. About 90 percent of advanced economies are projected to see a decline in growth in 2023. With the sharp slowdown, advanced economies are expected to see higher unemployment: a rise of 0.5 percentage point on average from 2022 to 2024.

For emerging market and developing economies, economic prospects are on average stronger than for advanced economies, but these prospects vary more widely across regions. On average, growth is expected to be 3.9 percent in 2023 and to rise to 4.2 percent in 2024. The forecast for 2023 is modestly lower (by 0.1 percentage point) than in the January 2023 WEO Update and significantly below the 4.7 percent forecast of January 2022. In low-income developing countries, GDP is expected to grow by 5.1 percent, on average, over 2023–24, but projected per capita income growth averages only 2.8 percent during 2023–24, below the average for middle-income economies (3.2 percent) and so below the path needed for standards of living to converge with those in middle-income economies.

OVERVIEW OF NBFCs' CREDIT

1. Introduction

The Indian banking industry is classified into scheduled and non-scheduled banks. Banks that are included in the Second Schedule to the Reserve Bank of India Act, 1934 are called scheduled banks. These banks are then further classified into scheduled commercial banks (“SCBs”) and scheduled co-operative banks. SCBs are banks that are permitted to conduct the normal business of banking, which entails collecting deposits, sanctioning loans and offering other banking services. SCBs are further divided into Public Sector Banks (“PSBs”), Private Banks (“PVBs”), Foreign Banks and Regional Rural Banks (“RRBs”).

Apart from SCBs, there are non-banking financial companies (“NBFCs”) that also play an important role in the Indian financial system by complementing and competing with banks, and by promoting efficiency and diversity into financial intermediation. NBFCs have evolved considerably in terms of operations, heterogeneity, asset quality and profitability, and regulatory architecture.

NBFCs can be classified on the basis of a) asset/liability structures; b) systemic importance; and c) the activities they undertake, according to the RBI. In terms of liability structures, NBFCs are subdivided into deposit-taking NBFCs (“NBFCs-D”) - which accept and hold public deposits - and non-deposit taking NBFCs (“NBFCs-ND”) - which source their funding from markets and banks. Among NBFCs-ND, those with asset size of Rs. 5 billion or more are classified as non-deposit taking systemically important NBFCs (“NBFCs-ND-SI”). As on July 31, 2022, there were 49 NBFCs-D and 415 NBFCs-ND-SI, according to RBI.

Since NBFCs cater to niche areas, they are also categorised on the basis of activities they undertake. Up until February 21, 2019, NBFCs were divided into 12 categories. Thereafter, these categories were harmonized by the RBI in order to provide NBFCs with greater operational flexibility. As a result, asset finance companies (“AFCs”), loan companies (“LCs”) and investment companies (“ICs”) were merged into a new category called Investment and Credit Companies (“NBFC-ICC”). Additionally, account aggregators has been added as category of NBFCs. At present, there are 12 categories of NBFCs in the activity- based classification.

Types of NBFCs

Type of NBFC	Nature of activity / Principal business
Investment and Credit Company (ICC)	Lending and investments.
Infrastructure Finance Company (IFC)	Providing loans for infrastructure development.
Infrastructure Debt Fund (IDF)	Facilitate flow of long-term debt to infrastructure projects.
Core Investment Company (CIC)	Investment in equity shares, preference shares, debt, or loans of group companies.
NBFC- Micro Finance Institution (NBFC-MFI)	Collateral free loans and advances to small borrowers.
NBFC – Factor	Factoring business i.e., financing of receivables.
Non-Operative Financial Holding Company (NOFHC)	For setting up new banks in private sector through its promoter/promoter groups.
Mortgage Guarantee Company (MGC)	Providing mortgage guarantees for loans.
Asset Reconstruction Company (ARC)	Acquiring and dealing in financial assets sold by banks and financial institutions.
Peer-to-Peer Lending platform (P2P)	Providing an online platform to bring lenders and borrowers together to help mobilise funds
Account Aggregator (AA)	Collecting and providing information about a customer’s financial assets in a organised and retrievable manner to the customer or others as specified by the customer.
Housing Finance Company (HFC)	Financing for housing.

In October 2021, RBI decided to classify NBFCs based on size and risk perception using Scale Based Approach – The Filtering Process by segregating NBFCs into four categories namely NBFC Base Layer (BL), NBFC Middle Layer (ML), NBFC Upper Layer (UL), and NBFC Top Layer (TL).

Classification of NBFCs

NBFC BL	NBFCs with asset size of not more than Rs. 10 billion, Type 1 NBFC, Peer to Peer (P2P), Account Aggregator (AA), and Non-Operative Financial Holding Company (NOFHC)
NBFC ML	NBFC-ND that are systematically important (SI) having an asset size of less than Rs. 10 billion and also NBFC-HFCs, IFCs, IDFs, CICs, and Standalone Primary Dealers irrespective of their asset size
NBFC UL	Top NBFCs to be filtered based on their size & leverage, inter-connectedness, complexity, and superior inputs (including group structure, liability mix, and segment penetration).
NBFC TL	Top Layer will remain empty unless RBI takes a view on specific NBFCs in the Upper Layer

Additionally, Investment and Credit Companies (NBFC-ICC), Micro Finance Institution (NBFC-MFI), NBFC-Factors and Mortgage Guarantee Companies (NBFC-MGC) that can be classified under any layer of the regulatory structure depending on the parameters of the scale based regulatory framework. Government owned NBFCs can only be classified under base layer or middle layer.

Further, as per RBIs notification as on October 11, 2022 titled “Multiple NBFCs in a Group: Classification in Middle Layer”. NBFCs that are part of a common Group or are floated by a common set of promoters are required to be viewed on a consolidated basis. For the consolidation of assets of the NBFCs in a Group, the total assets of

all the NBFCs in a Group shall be consolidated to determine the threshold for their classification in the Middle Layer.

Recognition of NBFCs in Upper Layer:

NBFC categorization is based on an annual review. The paper recognizes two parameters; quantitative and qualitative:

- The quantitative parameters will have 70% weightage.
- The qualitative parameters will have 30% weightage.

The table below represents quantitative and qualitative parameters as proposed:

Parameter	Sub-parameter	Sub weight	Weights
Quantitative Parameters (70%)			
Size & Leverage	Size: Total exposure (on-and off-balance sheet) Leverage: total debt to total equity	20+15	35
Interconnectedness	i) Intra-financial system assets: – Lending to FIs – Securities of other FIs – Mark to market REPO – OTC derivatives ii) Intra-financial system liabilities – Borrowings from FIs – Marketable securities issued by the finance company to FI – Mark to market OTC derivative with FIs iii) Securities outstanding (issued by NBFC)	10 10 5	25
Complexity	i) Notional amount of OTC derivatives – CCP centrally – Bilateral OTC ii) Trading and available for sale securities	5 5	10
Qualitative Parameters/Supervisory inputs (30%)			
Nature and type of liabilities	– Degree of reliance on short term funding – Liquid asset ratios – Callable debts – Asset-backed funding Vs. other funding – Asset liability duration and gap analysis – Borrowing split (secured debt, CCPs, CPs, unsecured debt)	10	30
Group Structure	– Total number of entities – Total number of layers – Total intra-group exposure	10	
Segment Penetration	Importance of NBFC as a source of credit in a specific segment or area	10

Further, as per RBI's notification as on June 06, 2022 titled "Provisioning for Standard assets by Non-Banking Financial Company – Upper Layer". NBFCs classified as NBFC-UL shall maintain provisions in respect of 'standard' assets at the following rates for the funded amount outstanding:

Category of Assets	Rate of Provision
Individual housing loans and loans to Small and Micro Enterprises (SMEs)	0.25%
Housing loans extended at teaser rates	2%, which will decrease to 0.4% after 1 year from the date on which the rates are reset at higher rates (if the accounts remain 'standard')
Advances to Commercial Real Estate – Residential Housing (CRE - RH) Sector	0.75%
Advances to Commercial Real Estate (CRE) Sector (other than CRE-RH)	1%
Restructured advances	As stipulated in the applicable prudential norms for restructuring of advances
All other loans and advances not included above, including loans to Medium Enterprises	0.4%

1.2. Credit growth of SCBs and NBFCs

Credit disbursed by SCBs and NBFCs is broadly classified into two parts – food and non-food credit. Food credit accounts for a fraction of total credit disbursed. Non-food credit makes up close to 99% of total credit extended by SCBs and NBFCs and the movement in overall credit growth therefore hinges on the movement in non-food credit growth.

SCBs' and NBFCs' Credit Deployed

Source: CMIE, RBI, CareEdge Research, Data are provisional

Bank credit growth, including food and non-food credit growth, witnessed a slowdown in Fiscal 2020 on account of a gradual slowdown in the economy and the resultant fall in demand. Credit growth declined to 6.1% as of March 2020. The outbreak of COVID-19 led to a further easing of credit growth to 5.6% as of March 2021. Following the end of COVID-19-related lockdowns, the credit growth registered a pick up and ended Fiscal 2022 at Rs. 118.9 trillion, 8.6% higher than at end of Fiscal 2021.

A default in debt repayments by a large NBFC in India in 2018 led to heightened investor focus around the health of the broader NBFC sector as well as their sources of liquidity. This led to some tightening in liquidity available to certain NBFCs and, as a result, it became more difficult for certain NBFCs to access debt and raise equity capital. NBFCs recorded a similar trajectory in their credit growth over the past three years. NBFCs' credit grew by 9.6% in Fiscal 2021, it moderated to 5.6% as of March 2022 over March 2021. CareEdge Research believes that the moderation was partly due to caution on the part of NBFCs in deploying credit while maintaining asset quality, and largely due to the second wave of the pandemic, which impacted rural and semi-urban India – and this demographic group forms the large chunk of NBFCs' customer base.

Gross credit deployed by NBFCs

Source: CMIE, RBI, CareEdge Research

To maintain the asset quality post the moratorium in the first half of FY22, NBFCs were more cautious while deploying any fresh credit, which led to a slight decline in NBFCs' total credit deployed. As of March 2022, NBFCs' credit deployed reached Rs. 28.5 trillion, this increase was on account of ramp-up in economic activity, improved liquidity and strong balance sheets coupled with high provisions, which supported the asset quality and credit growth for NBFCs.

Retail Credit portfolio of SCBs & NBFCs

Source: CMIE, RBI, CareEdge Research

As of March 2022, retail credit was approximately 26% of NBFCs' gross credit deployed and nearly 29% of SCBs' gross credit deployed. Banks and NBFCs are shifting their focus towards retail lending due to an increase in demand for retail credit. There has been a shift in consumer behaviour towards borrowing, consumers want to create a better standard of living and are ready to borrow personal loans to fulfil those needs.

1.3. Growth Drivers

Last mile financing & unbanked population

NBFCs have a strong presence in unorganized and under-served areas where banks may not have a strong foothold. This is on account of the absence of necessary infrastructure of banks in these areas as well as an aversion on the part of banks to disburse loans to smaller companies. The ease of internet access and affordable data packs have not only contributed to increased spending and demand for retail credit from these areas, but have also increased the potential consumer base of NBFCs.

Focus on informal customer base

Traditional banks may not be very keen on lending to retail borrowers from semi-urban and rural areas or small companies with weaker credit scores and lack of documentation, when compared to larger borrowers. However, in terms of volume, the number of potential customers in this category is higher and NBFCs have created niche segment by having customized credit assessment method based on cash flow assessment and field verification. This gives NBFCs an opportunity to extend credit to the financially weaker set of customers, a growing customer base in the informal customer segment opens up avenues for NBFCs' growth.

Technological adoption and Co-lending arrangements:

NBFCs deploy technological solutions to develop innovative products and lower operational costs. Since NBFCs are fairly new in the financial landscape as compared to most banks, they are more agile and better positioned to leverage technology to enhance their reach while increasing efficiency.

NBFCs also partner with various alternative financiers and commercial banks, which enables them to diversify their income avenues and reach their targeted customer base through different channels.

Shift in buying behaviour

Over the years, there has been significant change in perception of consumers towards borrowing. With the need to improve lifestyle, more and more people especially the younger population are moving towards borrowing to attain a certain standard of living.

Rising demand from retail customers

Retail borrowers accounted for around 26% of total credit disbursed by NBFCs as on 31 March 2022, as per data published by the RBI. Along with being a significant chunk of the customer base of NBFCs, the retail segment has shown a consistent growth in credit demand throughout the pandemic. Going forward, CareEdge Research believes that the demand for consumer durables, consumption of services, home loans and gold loans are likely to support the growth in retail demand and, consequently, aid in the new business of NBFCs.

Increased demand from MSME and agriculture

Favourable Government policies aimed at boosting agriculture, small-scale industries and consumption are likely to act as long-term growth catalysts in improving demand for MSME and agricultural credit. The “Make in India”, “Start-up

India” initiatives, for example, are likely to support industrial activity and contribute to the demand for credit from NBFCs. As on 28 November 2022, more than 12,244,823 micro, small and medium enterprises (MSMEs) have registered on the Udyam portal, of which 11,778,071 are micro enterprises; 427,267 are small enterprises; and 39,485 are medium enterprises. Micro and small enterprises represent 99.7% of the total registered MSMEs as of 28 November 2022. The coverage of the formal banking system in MSMEs still remains low, which provides a major opportunity to NBFCs to expand their reach.

1.4. Distribution between segments

Sectoral distribution of NBFCs' credit

Source: RBI, CareEdge Research

Note: Industry includes credit to micro, small, medium and large enterprises; Retail loans are personal loans for housing loans, consumer durables, auto loans, and other personal loans; Services include credit towards commercial real-estate, retail trade and other such loans

The industry sector has remained the largest recipient of credit extended by NBFCs followed by retail loans, services, other non-food credit, and agriculture & allied activities. Following the IL & FS crisis, NBFCs' exposure to the manufacturing declined, as per data published by RBI, as NBFCs were facing liquidity crunch and were hesitant to deploy long term credit to industry. However, after recovering from the IL & FS crisis and the impact of the COVID- 19 pandemic, NBFCs have improved liquidity and stronger balance sheets. NBFCs have increased the amount of credit deployed to industry on account of an improved demand for credit amid the reopening of the economy and resumption of manufacturing activities. As of March 2022, industry credit contributed to Rs. 11.1 trillion that is around 40% of NBFCs gross credit deployed, according to the RBI.

While NBFCs' credit to industry is growing, their credit to services is declining majorly on account of the decline in credit to the commercial real estate sector and retail trade. The commercial real estate sector and the retail trade sector were highly impacted during the COVID-19 pandemic as the nationwide lockdown halted construction activities and the movement of people and goods. However, in FY22 NBFCs credit to services has increased on account of improved demand from transport operators, professional services and other NBFCs. As of March 2022, as per data published by RBI, credit deployed to the service sector contributed to Rs. 4.4 trillion that is around 15.3% of NBFCs gross credit deployed.

Retail loans comprise housing loans, vehicle loans, loans against gold, consumer durables loans and other such personal loans. In 2019, retail credit accounted for around 26% of total credit deployed by NBFCs. As of March 2022, the contribution of retail loans increased to nearly a third of NBFCs gross credit deployed, which stood at Rs. 28.5 trillion.

1.5. Outlook

CareEdge Research believes assets under management of NBFCs is expected to be higher at around 6-9% in Fiscal 2023 driven by an increased focus on extending credit to customers belonging to segments where the penetration of bank credit is low, ease of access to internet and investments made in technology infrastructure due to the COVID-19 pandemic. In terms of segmental growth, CareEdge Research expects the retail segment to continue its growth momentum, while credit to industry will likely remain a laggard.

CareEdge Research believes that NBFCs are shifting their focus towards retail financing, which is anticipated to show a healthy growth with a pick-up in economic activity and increased penetration of financial institutions providing convenient financing options to borrowers.

The retail segment comprises vehicle loans, consumer durable loans, advances against golds, real estate loans and other such individual loans. The retail segment is likely to significantly contribute to NBFCs' growth, especially in case of housing loans and vehicle loans. These segments are likely to continue their growth momentum on the back of steady demand. Growth in vehicle segment is anticipated to see growth on the back of automotive industry's growth. In the near term, the growth is likely to be supported by new model launches and sustained demand for vehicles during the first four months of FY23, supported by improved availability of semi-conductors.

Gold loans are a highly secured and liquid asset class that generates high returns with minimal credit losses and encourages financial institutions to extend their credit towards gold loans. CareEdge Research believes that with the rise in the price of gold amidst geopolitical unrest, a large geographic reach and the fast turnaround time on loan application, the demand for gold loans to fund the working capital of micro enterprises and an individual's personal requirements will grow.

CareEdge Research believes that real estate financing will grow with the sustained demand for affordable housing. However, the hike in interest rates and high property prices will continue to be a key monitorable for the real estate finance segment as a whole.

In the coming months, CareEdge Research expects NBFCs to grow on account of improved demand for credit that will facilitate disbursements. In addition to this, CareEdge Research expects high provisions against non-performing assets and improved capital positions will aid this growth.

MSME

2.1. Introduction to MSMEs

The micro, small and medium enterprises ("MSME") sector is a vibrant and dynamic sector with crucial linkages to employment. The MSME sector is considered the growth engine of the Indian economy, with significant contribution to the GDP, exports and employment generation. The sector contributes significantly in the economic and social development of the country by fostering entrepreneurship and generating large employment opportunities at comparatively lower capital cost, next only to agriculture.

MSMEs are complementary to large industries as ancillary units and the sector therefore contributes significantly in the inclusive industrial development of the country. MSMEs are widening their domain across sectors of the economy, producing a diverse range of products and services to meet demands of domestic as well as global markets.

In accordance with the provision of Micro, Small & Medium Enterprises Development (“MSMED”) Act, 2006 MSMEs are classified as follows:

Enterprise Category	Investment in Plant & Machinery or Equipment	Annual Turnover
Micro Enterprises	Does not exceed 10 million	Does not exceed Rs. 50 million
Small Enterprises	More than Rs. 10 million but does not exceed Rs. 100 million	More than Rs. 50 million but does not exceed Rs. 500 million
Medium Enterprises	More than Rs. 100 million but does not exceed Rs. 500 million	More than Rs. 500 million but does not exceed Rs. 2,500 million

Number of MSMEs in India

Category	Number of MSMEs
Micro	11,778,071
Small	4,27,267
Medium	39,485
Total	12,244,823

Source: Udyam portal, Data as of 28th November 2022.

As per the Udyam portal, around 12 million MSMEs are registered under Udyam portal, of which around 96.2% enterprises are micro category and around 3.8% of the enterprises fall under small category and the remaining are medium enterprises.

As per the National Sample Survey (NSS) 73rd round, conducted by National Sample Survey Office, Ministry of Statistics & Programme Implementation during the period 2015-16, there were 63,388,000 unincorporated non-agriculture MSMEs in the country engaged in different economic activities (manufacturing, electricity, trade and other services). Of this, micro enterprises sector with 63,052,000 accounted for more than 99% of total estimated number of MSMEs. While the small enterprise sector with around 3,31,000 makes up 0.52% of total estimated number of MSMEs and the medium enterprise sector with around 5,00,000 that is around 0.01% of total estimated MSMEs, respectively.

2.2. Credit to MSMEs

SCBs and NBFCs credit exposure to MSMEs

Outstanding as on	NBFCs			SCBs		
	Micro and Small Enterprise	Medium Enterprise	Total	Micro and Small Enterprise	Medium Enterprise	Total
	₹ in billions					
March 2019	373.6	160.2	533.8	3,755.1	1,063.9	4,819.0
March 2020	364.4	139.3	503.7	3,922.6	10,510.0	4,973.6
March 2021	442.9	150.4	593.3	4,331.9	1,386.0	5,717.9
March 2022	445.7	111.4	557.2	5,327.9	2,140.0	7,467.9

Source: RBI, CareEdge Research

Note: The credit exposure for MSMEs is NBFCs and SCBs credit exposure to 'Micro & Small' and 'Medium' enterprises under 'Industrial Sector' only.

NBFCs' credit deployed to MSMEs engaged in the manufacturing sector as per RBI was on a downtrend and stood at Rs. 503.7 billion as of March 2020 due to a combination of weakened demand from MSMEs and nagging liquidity issues of NBFCs. NBFCs mainly deploy credit to MSMEs belonging to the services and agricultural sectors. In comparison, bank credit to MSMEs witnessed a consistent growth. Bank credit deployed to MSMEs witnessed an improvement in the year ending March 2021 and strengthened further in the first half of Fiscal 2022 on account of a resurgence in demand from MSMEs as well as support from the Central Government by way of credit guarantee. The emergency credit line guarantee scheme or the Emergency Credit Line Guarantee Scheme (ECLGS) announced by the Government in May 2020 after the pandemic hit the country in March 2020 revived credit offtake by MSMEs. The scheme was introduced to help mitigate the economic distress faced by MSMEs by providing them additional funding in the form of a fully guaranteed emergency credit line.

The credit extended towards MSME has increased significantly as the Government encouraged banks to extend credit to MSMEs and aid them to buffer the effects of the COVID-19 pandemic. AS micro and small enterprises were more vulnerable, the credit towards them during the pandemic increased significantly during Fiscal 2021, as per data published by the RBI. On the other hand, medium enterprises were able to buffer the effects of pandemic to a certain extent. Although the credit towards medium enterprises increased over the previous Fiscal year, the growth was moderate compared to growth in credit extended to micro and small enterprises.

2.3 Share of Banks & Non-Banks in MSME lending

Share of banks & NBFCs in MSME lending

Source: RBI, CareEdge Research

Note: The credit exposure for MSMEs is NBFCs and SCBs credit exposure to 'Micro & Small' and 'Medium' enterprises under 'Industrial Sector' only.

The MSME sector is underpenetrated by NBFCs and there is a huge unmet credit demand in the sector, primarily due to lack of documentation and credit history required to access to financing from formal banking channels. There is also a significant gap between the original credit requirement and the actual credit exposure of formal channels to MSMEs, which provides a huge opportunity in MSME lending.

2.4. Asset Quality Trends for Banks

Bank-wise SMA distribution of MSME Portfolio

Period ended	Public sector banks + Private sector banks				
	0 days past due	SMA-0	SMA-1	SMA-2	GNPA
March 2021	74.0%	7.3%	5.7%	2.2%	10.8%
June 2021	72.4%	8.6%	3.8%	3.4%	11.9%
September 2021	76.3%	6.6%	2.6%	3.1%	11.3%
December 2021	75.4%	8.8%	3.1%	2.3%	10.4%
March 2022	79.7%	6.4%	3.5%	1.1%	9.3%

Source: RBI, CareEdge Research

MSMEs have poor financial muscle and were severely impacted by the COVID-19 pandemic. Since most MSMEs operate in the manufacturing sector, the nationwide lockdown, which impacted production as well as demand, caused increased stress to MSMEs. Additionally, MSMEs likely witnessed delayed payments on orders serviced and the inability to adopt digitization or accommodate higher costs on social distancing and limited workforce impaired

MSMEs' operations. Many went out of business and some struggled to tide over the crisis with cash flow issues, which translated into a strain on their ability to repay banks.

MSMEs seeking loans from banks also struggled to meet their obligations due to uncertainty and the second wave of the pandemic. As per data published by the RBI, GNPA's from the MSME segment witnessed a spike in Fiscal 2021 and rose further to 18.8% towards the end of June 2021, which coincided with the second wave of COVID-

19. GNPA's declined at the start of September 2021 as operations returned back to normalcy. GNPA's have further improved and declined to 9.3% in Fiscal 2022. CareEdge Research estimates GNPA levels to ease gradually over the next fiscal year.

2.5. Outlook

The MSME sector is the driving force of the Indian economy and has major potential to spread industrialization across the economy. However, this sector is small in terms of scale of operations, business size. MSMEs employ a large number of people making the sector a key contributor to the economic development of the country. The sheer number of work force engaged also results in this sector receiving Government support and benefits.

Apart from Government initiatives, the improved use of digital solutions adopted during the pandemic (such as easy payments and marketing through digital platforms) increased demand for finished products have strengthened the MSMEs and resulted in recovery of their business.

In addition to this the extension of Emergency Credit Line Guarantee Scheme (ECLGS), that assists MSMEs in availing credit required to ensure recovery, until March 31, 2023 is likely to aid in the recovery and growth of this sector. Besides, an additional Rs. 2,000 trillion provided by Government through the Credit guarantee trust for micro and small enterprises (CGTMSE) are expected to further encourage growth of the sector. These initiatives are expected to stimulate credit outreach to MSMEs, provide last-mile financial inclusion and promote job creation in the sector.

The MSME sector is expected to help India achieve its goal of becoming a USD 5 trillion economy by 2025 and in order to achieve this goal, MSMEs have to generate employment opportunities, improve performance, transform their business operations and carry out technology-based production and invest in research and development activities. In addition to this, MSMEs are expected to contribute more than 40% of India's nominal GDP by Fiscal 2025 for which it will require immense support from the Government, institutions and banks.

It also forms basis of further expansion for our Company, as we are able to monitor a potential product/ market closely.

Leveraging of our Marketing Skills and Relationships

We continue to enhance our business operations by ensuring that our network of customers increases through our marketing efforts. Our core competency lies in our deep understanding of our customers' buying preferences and behavior, which has helped us in achieving customer loyalty. We endeavor to continuously improve the product mix offered to the customers as well as strive to understand and anticipate any change in the expectation of our clients towards our products.

We seek to diversify our credit risk and ensure that no individual credit product contributes a large portion to our overall credit book. We believe that this mitigates the risk of concentration to any particular product or sector and helps us to manage our risk exposure in a more effective manner.

Diversify our assets and liabilities

We intend to remain diversified in our loan book by strategically focusing on adjacent high growth and profitable lending businesses and further expand our lending and other businesses. We intend to continue to focus on developing a diversified funding model to achieve optimal cost of funds while balancing liquidity and concentration risks. As our cost of borrowings is determined by our financial discipline and business performance, we intend to source funding at competitive rates. In particular, with respect to our credit business, a decrease in cost of borrowings will enable us to price our products in a more competitive manner. We intend to further diversify and strengthen our profile, strategically adding additional funding resources.

Growth of the business through increasing geographical presence across India

We face competition in the lending business from domestic and international banks as well as other NBFCs, fintech lending platforms and private unorganized lenders. Banks are increasingly expanding into retail loans in the rural and semi-urban areas of India. We are exposed to the risk that these banks continue to expand their operations into the markets in which we operate, which would result in greater competition and lower spreads on our loans. In particular, many of our competitors may have operational advantages in terms of access to cost-effective sources of funding and in implementing new technologies and rationalising related operational costs.

Annexure -V Accounting Policies to restated Consolidated Financial Statements

1. STATEMENT OF COMPLIANCE

The consolidated financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as "Ind AS") prescribed under Section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules, as amended from time to time and other relevant provisions of the Act.

2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in preparation of the Standalone Financial Statements are as given below:

2.1 Basis of Preparation of Financial Statements

The consolidated financial statements have been prepared under the historical cost convention with the exception of certain assets and liabilities that are required to be carried at fair values by Ind AS.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

2.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company i.e. its subsidiaries. It also includes the Group's share of profits, net assets and retained post acquisition reserves of joint arrangements and associates that are consolidated using the equity or proportionate method of consolidation, as applicable.

Control is achieved when the Company is exposed to, or has rights to the variable returns of the entity and the ability to affect those returns through its power to direct the relevant activities of the entity.

The results of subsidiaries, joint arrangements and associates acquired or disposed off during the year are included in the consolidated statement of profit and loss from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Wherever necessary, adjustments are made to the financial statements of subsidiaries, joint arrangements and associates to bring their accounting policies in line with those used by other members of the Group.

Intra-group transactions, balances, income and expenses are eliminated on consolidation.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity. The interest of non-controlling shareholders may be initially measured either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, the carrying value of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if it results in the non-controlling interests having a deficit balance.

2.3 Basis of Measurement

The financial statements have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period, defined benefit plan – plan assets measured at fair value, assets held for sale which is measured at lower of cost or fair value less cost of sale. Historical cost is generally based on the fair value of the consideration given for goods and services.

Fair value measurements are categorised into Level 1, 2 or 3 as per Ind AS requirement, which are described as follows.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
Level 3 inputs are unobservable inputs for the asset or liability.

2.4 Property, Plant and Equipment and Investment Property

Recognition and Measurement

Property, plant and equipment held for use or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. The cost includes non-refundable taxes, duties, freight and other incidental expenses related to the acquisition and installation of the respective assets. Assets having individual value of less than ₹5,000/- are charged to statement of Profit and Loss in the year of purchase.

Investment Property consists of building let out to earn rentals. The Company follows cost model for measurement of investment property.

Depreciation

Depreciation is provided using the written down value method over the useful life as prescribed under Schedule II to the Companies Act, 2013.

Depreciation is calculated on pro-rata basis, including the month of addition and excluding the month of sale/disposal. Leasehold improvements are amortised over the underlying lease term on a straight line basis. Residual value in respect of Buildings and Vehicles is considered as 5% of the cost and in case of other assets "Nil".

The estimated useful lives, residual values and depreciation method are reviewed at the end of each

reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

De-recognition

An item of property, plant and equipment or investment property is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment or investment property is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Capital work-in-progress

Capital work-in-progress are carried at cost, comprising direct cost and related incidental expenses to acquire property, plant and equipment. Assets that are not ready to intended use are also shown under capital work-in-progress.

2.5 Intangible Assets

Recognition and measurement

Intangible assets are recognized at cost of acquisition which includes all expenditure that can be directly attributed or allocated on a reasonable and consistent basis, to create, produce or making the asset ready for its intended use.

Amortisation

Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

De-recognition

An intangible asset is de-recognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, is recognised in profit or loss when the asset is de-recognized.

2.6 Revenue Recognition

Interest income on loans

The Company recognizes interest income using Effective Interest Rate (EIR) on all financial assets subsequently measured at amortized cost or fair value through other comprehensive income (FVOCI). EIR is calculated by considering any fees and all incremental costs that are directly attributable to acquisition of a financial asset and it represents a rate that exactly discounts estimated future cash payments/receipts through the expected life of the financial asset to the gross carrying amount of a financial asset or to the amortized cost of a financial liability.

The Company recognizes interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets. In case of credit-impaired financial assets regarded as 'Stage 3', the Company recognizes interest income on the net amortized cost of financial assets at EIR. If financial asset is no longer credit-impaired Company reverts to calculating interest income on a gross basis.

Additional interest/overdue interest/penal charges are recognized only when it is reasonably certain that the ultimate collection will be made.

Sale of Product

Revenue from sale of products is recognised when control of the products has transferred, being when the products are delivered to the customer. Delivery occurs when the products have been shipped or delivered to the specific location as the case may be, the risk of loss has been transferred, and either the customer has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied. Sale of products include related ancillary services, if any.

Commission Income

Income from business correspondent services is recognized as and when the services are rendered as per agreed terms and conditions of the contract.

Rental Income

Rental income from investment property is recognised as part of revenue from operations in profit or loss on a straight line basis over the term of the lease except where the rentals are structured to increase in line with expected general inflation. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease. Rental income from sub-leasing is also recognised in a similar manner and included under other income.

Sale of Securities

Revenue from sale of securities is recognised to the extent that it can be reliably measured and is probable that the economic benefits will flow to the company.

Dividend Income

Dividend income is recognized at the time when the right to receive is established by the reporting date.

Miscellaneous Income

All other income is recognized on an accrual basis, when there is no uncertainty in the ultimate realization/ collection.

2.7 Borrowing costs

Borrowing costs consists of interest and other cost that the Company incurred in connection with the borrowing of funds. Borrowing costs charged to the Statement of Profit and Loss on the basis of effective interest rate method.

2.8 Income Taxes

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961.

Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and liability on a net basis.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable income. Deferred tax is measured at the tax rates based on the laws that have been enacted or substantively enacted by the reporting date, based on the expected manner of realisation or settlement of the carrying amount of assets/liabilities. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against liabilities, and they relate to income taxes levied by the same tax authority.

A deferred tax liability is recognised for all taxable temporary differences. A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that future taxable profits will be available against which the deductible temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

2.9 Employee benefits

Short term employee benefits

Short term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Other long term employee benefits

Benefits under the Company's leave encashment constitute other long term employee benefits. The Company's net obligation in respect of leave encashment is the amount of future benefit that employees have present value, and the fair value of any related assets is deducted. The calculation is performed using the projected unit credit method. Any gains or losses are recognized in profit or loss in the period in which they arise.

2.10 Cash and Cash Equivalent

Cash and comprises cash on hand and demand deposits. The Company considers cash equivalents as all short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

2.11 Equity Investment in Subsidiaries

Investments representing equity interest in subsidiaries are accounted for at cost in accordance with Ind AS 27 Separate Financial Statements

2.12 Provisions contingent assets and contingent liabilities

Provisions are recognized only when there is a present obligation, as a result of past events, and when a reliable estimate of the amount of obligation can be made at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Provisions are discounted to their present values, where the time value of money is material.

Contingent liability is disclosed for, Possible obligations which will be confirmed only by future events not wholly within the control of the Company or Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made. Contingent assets are not recognized but disclosed where an inflow of economic benefits is probable. as

2.13 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Company as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

The Company as lessee

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

2.14 Foreign currency

Functional And presentation currency

Items included in the financial statement of the Company are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements have been prepared and presented in Indian Rupees (INR), which is the Company's functional and presentation currency.

Transaction and Balances

Foreign currency transactions are translated into the functional currency, by applying the exchange rates on the foreign currency amounts at the date of the transaction. Foreign currency monetary items outstanding at the balance sheet date are converted to functional currency using the closing rate. Non-monetary items denominated in a foreign currency which are carried at historical cost are reported using the exchange rate at the date of the transaction.

Exchange differences arising on monetary items on settlement, or restatement as at reporting date, at rates different from those at which they were initially recorded, are recognized in the Statement of Profit and Loss in the year in which they arise.

2.15 Segment reporting

The Company identifies segment basis of the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are regularly reviewed by the CODM (chief operating decision maker) and in assessing performance. The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship with the operating activities of the segment.

2.16 Use of Judgements and Estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities (including contingent liabilities and assets) as on the date of the financial statements and the reported income and expenses for the reporting period. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

2.17 Earning Per Share

Basic earnings per equity share is calculated by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year.

To calculate diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

2.18 Dividends

Final dividends are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Board of Directors of the Company.

2.19 Impairment of Non-Financial Assets

At each reporting date, the Company assesses whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. Recoverable amount is higher of an asset's net selling price and its value in use. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Statement of Profit and Loss. If at the reporting date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses are recognised in profit and loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.20 Impairment of Financial Assets

The Company recognises impairment allowances for ECL on all the financial assets that are not measured at FVTPL:

Financial assets that are debt instruments Lease receivables
Financial guarantee contracts issued Loan commitment issued

No impairment loss is recognised on equity investments

ECL are probability weighted estimate of credit losses. They are measured as follows:

Financial assets that are not credit impaired- as the present value of all cash shortfalls that are possible within 12 months after the reporting date.

Financial assets with significant increase in credit risk but not credit impaired – as the present value of all cash shortfalls that result from all possible default events over the expected life of the financial asset

Financial assets that are credit impaired – as the difference between the gross carrying amount and the present value of estimated cash flows

With respect to trade receivables and other financial assets, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For financial assets at FVTOCI, the loss allowance is recognised in OCI.

Loan assets- The Company follows a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarized below:

Stage 1 includes loan assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date.

Stage 2 includes loan assets that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment.

Stage 3 includes loan assets that have objective evidence of impairment at the reporting date.

The Expected Credit Loss (ECL) is measured at 12-month ECL for Stage 1 loan assets and at lifetime ECL for Stage 2 and Stage 3 loan assets.

Write-off

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument on statement of profit and loss.

2.21 Financial Instruments

A Financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted for transaction costs. Subsequent measurement of financial assets and financial liabilities is described below.

(A) Non-derivative financial assets
Subsequent Measurement

Financial assets carried at amortized cost – a financial asset is measured at the amortized cost if both the following conditions are met: The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in interest income in the Statement of Profit and Loss.

Financial assets (debt instruments e.g. loans) are measured at FVOCI when both of the following conditions are met:

The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets.

The contractual terms of the financial asset meet the SPPI test.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognized in OCI. Interest income are recognized in profit or loss in the same manner as for financial assets measured at amortized cost.

Financial assets measured at FVPL – FVPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVPL, with all changes recognized in the P&L.

Derecognition of Financial Assets

Financial assets (or where applicable, a part of financial asset or part of a group of similar financial assets) are de-recognized (i.e. removed from the Company's balance sheet) when the contractual rights to receive the cash flows from the financial asset have expired, or when the financial asset and substantially all the risks and rewards are transferred. Further, if the Company has not retained control, it shall also de-recognize the financial asset and recognize separately as assets or liabilities any rights and obligations created or retained in the transfer.

(B) Non Derivatives Financial Liabilities
Subsequent Measurement

Subsequent to initial recognition, all non-derivative financial liabilities are measured at amortized cost using the effective interest method.

Derecognition of Financial Liabilities

A financial liability is de-recognized when the obligation under the liability is discharged or canceled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de- recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

2.22 Fair value measurement

The Company measures financial instruments at fair value at each balance sheet date using valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured are categorized with fair value hierarchy into Level I, Level II and Level III based on level of input.

2.23 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Company has a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

ADVIK CAPITAL LIMITED

Regd. Office: G-3, VIKAS HOUSE, 34/1, EAST PUNJABI BAGH Punjabi Bagh, New Delhi-110026
CIN: L65100DL1985PLC022505 | www.advikgroup.com

Annexure -VI Notes to restated Consolidated Financial Statements

The categories used are as follows:

Level 1: Quoted prices (unadjusted) for identical instruments in an active market;

Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs; and

Level 3: Inputs which are not based on observable market data (unobservable inputs).

Valuation technique used to determine fair value

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, the Company determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method, market comparable method, recent transactions happened in the Company and other valuation models. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Valuation process and technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

Eligible loans valued by discounting the aggregate future cash flows (both principal and interest cash flows) with credit risk-adjusted discounting rate for the remaining portfolio tenor. The Company has considered the average valuation impact arrived using risk free, cost of funds and yield free securitization approach.

The use of net asset value for certificate of deposits and mutual funds on the basis of the statement received from investee party.

(C) Fair value of instruments measured at amortized cost

Fair value of instruments measured at amortized cost for which fair value is disclosed is as follows, these fair values are calculated using Level 3 inputs:

Financial assets measured at amortized cost

**Annexure -V Accounting Policies and Notes to restated Financial Statements
(a) Accounting Policies to restated financial statements**

1. STATEMENT OF COMPLIANCE

The financial statements for the year ended March 31, 2023 have been prepared by the Company in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time, and other applicable regulatory norms/guidelines/framework. The Standalone Balance Sheet, Statement of Profit and Loss and Statement of Changes in Equity are prepared and presented as per the requirements of Division III of Schedule III to the Companies Act, 2013 applicable for Non- Banking Financial Companies (NBFC).

2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in preparation of the Standalone Financial Statements are as given below:

2.1 Basis of Preparation of Financial Statements

These Standalone Financial Statements have been prepared on going concern basis following accrual system of accounting. The assets and liabilities have been measured at historical cost or at amortised cost or at fair value at the end of each reporting period.

2.2 Basis of Measurement

The financial statements have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period, defined benefit plan – plan assets measured at fair value, assets held for sale which is measured at lower of cost or fair value less cost of sale. Historical cost is generally based on the fair value of the consideration given for goods and services.

Fair value measurements are categorised into Level 1, 2 or 3 as per Ind AS requirement, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and Level 3 inputs are unobservable inputs for the asset or liability.

2.3 Property, Plant and Equipment and Investment Property

Recognition and Measurement

Property, plant and equipment held for use or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. The cost includes non-refundable taxes, duties, freight and other incidental expenses related to the acquisition and installation of the respective assets. Assets having individual value of less than ₹5,000/- are charged to statement of Profit and Loss in the year of Investment Property consists of building let out to earn rentals. The Company follows cost model for measurement of investment property.

Depreciation

Depreciation is provided using the written down value method over the useful life as prescribed under Schedule II to the Companies Act, 2013. Depreciation is calculated on pro-rata basis, including the month of addition and excluding the month of sale/disposal. Leasehold improvements are amortised over the underlying lease term on a straight line basis. Residual value in respect of Buildings and Vehicles is considered as 5% of the cost and in case of other assets 'Nil'.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

De-recognition

An item of property, plant and equipment or investment property is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment or investment property is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Capital work-in-progress

Capital work-in-progress are carried at cost, comprising direct cost and related incidental expenses to acquire property, plant and equipment. Assets that are not ready to intended use are also shown under capital work-in-progress.

2.4 Intangible Assets

Recognition and measurement

Intangible assets are recognized at cost of acquisition which includes all expenditure that can be directly attributed or allocated on a reasonable and consistent basis, to create, produce or making the asset ready for its intended use.

Amortisation

Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

De-recognition

An intangible asset is de-recognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, is recognised in profit or loss when the asset is de-recognized.

2.5 Revenue Recognition

Interest income on loans

The Company recognizes interest income using Effective Interest Rate (EIR) on all financial assets subsequently measured at amortized cost or fair value through other comprehensive income (FVOCI). EIR is calculated by considering any fees and all incremental costs that are directly attributable to acquisition of a financial asset and it represents a rate that exactly discounts estimated future cash payments/receipts through the expected life of the financial asset to the gross carrying amount of a financial asset or to the amortized cost of a financial liability.

The Company recognizes interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets. In case of credit-impaired financial assets regarded as 'Stage 3', the Company recognizes interest income on the net amortized cost of financial assets at EIR. If financial asset is no longer credit-impaired Company reverts to calculating interest income on a gross basis.

Additional interest/overdue interest/penal charges are recognized only when it is reasonably certain that the ultimate collection will be made.

Commission income

Income from business correspondent services is recognized as and when the services are rendered as per agreed terms and conditions of the contract.

Dividend Income

Dividend income is recognized at the time when the right to receive is established by the reporting date.

Rental Income

Rental income from investment property is recognised as part of revenue from operations in profit or loss on a straight line basis over the term of the lease except where the rentals are structured to increase in line with expected general inflation. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease. Rental income from sub-leasing is also recognised in a similar manner and included under

Sale of Securities

Revenue from sale of securities is recognised to the extent that it can be reliably measured and is probable that the economic benefits will flow to the company.

Miscellaneous Income

All other income is recognized on an accrual basis, when there is no uncertainty in the ultimate realization/ collection.

2.6 Borrowing costs

Borrowing costs consists of interest and other cost that the Company incurred in connection with the borrowing of funds. Borrowing costs charged to the Statement of Profit and Loss on the basis of effective interest rate method.

2.7 Income Taxes

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax assets and liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and liability on a net basis.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable income. Deferred tax is measured at the tax rates based on the laws that have been enacted or substantively enacted by the reporting date, based on the expected manner of realisation or settlement of the carrying amount of assets/liabilities. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against liabilities, and they relate to income taxes levied by the same tax authority. A deferred tax liability is recognised for all taxable temporary differences. A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that future taxable profits will be available against which the deductible temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

2.8 Employee benefits

Short term employee benefits

Short term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Other long term employee benefits

Benefits under the Company's leave encashment constitute other long term employee benefits. The Company's net obligation in respect of leave encashment is the amount of future benefit that employees have present value, and the fair value of any related assets is deducted. The calculation is performed using the projected unit credit method. Any gains or losses are recognized in profit or loss in the period in which they arise.

2.9 Cash and Cash Equivalent

Cash and comprises cash on hand and demand deposits. The Company considers cash equivalents as all short- term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value

2.10 Equity Investment in Subsidiaries

Investments representing equity interest in subsidiaries are accounted for at cost in accordance with Ind AS 27 Separate Financial Statements.

2.11 Provisions contingent assets and contingent liabilities

Provisions are recognized only when there is a present obligation, as a result of past events, and when a reliable estimate of the amount of obligation can be made at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Provisions are discounted to their present values, where the time value of money is material.

Contingent liability is disclosed for, Possible obligations which will be confirmed only by future events not wholly within the control of the Company or Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made. Contingent assets are not recognized but disclosed where an inflow of economic benefits is probable.

2.12 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Company as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

The Company as lessee

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

2.13 Foreign currency

Functional And presentation currency

Items included in the financial statement of the Company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements have been prepared and presented in Indian Rupees (INR), which is the Company's functional and presentation currency.

Transaction and Balances

Foreign currency transactions are translated into the functional currency, by applying the exchange rates on the foreign currency amounts at the date of the transaction. Foreign currency monetary items outstanding at the balance sheet date are converted to functional currency using the closing rate. Non- monetary items denominated in a foreign currency which are carried at historical cost are reported using the exchange rate at the date of the transaction.

Exchange differences arising on monetary items on settlement, or restatement as at reporting date, at rates different from those at which they were initially recorded, are recognized in the Statement of Profit and Loss in the year in which they arise.

2.14 Segment reporting

The Company identifies segment basis of the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are regularly reviewed by the CODM ('chief operating decision maker') and in assessing performance. The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship with the operating activities of the segment.

2.15 Use of Judgements and Estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities (including contingent liabilities and assets) as on the date of the financial statements and the reported income and expenses for the reporting period. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

2.16 Earning Per Share

Basic earnings per equity share is calculated by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year.

To calculate diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

2.17 Dividends

Final dividends are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Board of Directors of the Company.

2.18 Impairment of Non-Financial Assets

At each reporting date, the Company assesses whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. Recoverable amount is higher of an asset's net selling price and its value in use. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Statement of Profit and Loss. If at the reporting date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses are recognised in profit and loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.19 Impairment of Financial Assets

The Company recognises impairment allowances for ECL on all the financial assets that are not measured at FVTPL:

Financial assets that are debt instruments Lease receivables
Financial guarantee contracts issued Loan commitment issued

No impairment loss is recognised on equity investments

ECL are probability weighted estimate of credit losses. They are measured as follows:

Financial assets that are not credit impaired - as the present value of all cash shortfalls that are possible within 12 months after the reporting date.

Financial assets with significant increase in credit risk but not credit impaired - as the present value of all cash shortfalls that result from all possible default events over the expected life of the financial asset.

Financial assets that are credit impaired - as the difference between the gross carrying amount and the present value of estimated cash flows

With respect to trade receivables and other financial assets, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For financial assets at FVTOCI, the loss allowance is recognised in OCI.

Loan assets- The Company follows a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarized below:

Stage 1 includes loan assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date.

Stage 2 includes loan assets that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment.

Stage 3 includes loan assets that have objective evidence of impairment at the reporting date.

The Expected Credit Loss (ECL) is measured at 12-month ECL for Stage 1 loan assets and at lifetime ECL for Stage 2 and Stage 3 loan assets.

Write-off

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument in statement of profit and loss.

2.20 Financial instruments

A Financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted for transaction costs. Subsequent measurement of financial assets and financial liabilities is described below.

(A) Non-derivative financial assets

Subsequent Measurement

Financial assets carried at amortized cost – a financial asset is measured at the amortized cost if both the following conditions are met:

The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in interest income in the Statement of Profit and Loss.

Financial assets (debt instruments e.g. loans) are measured at FVOCI when both of the following conditions are met:

The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets.

The contractual terms of the financial asset meet the SPPI test.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognized in OCI. Interest income are recognized in profit or loss in the same manner as for financial assets measured at amortized cost.

Financial assets measured at FVPL – FVPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVOCI, is classified as at FVPL, with all changes recognized in the P&L.

Derecognition of Financial Assets

Financial assets (or where applicable, a part of financial asset or part of a group of similar financial assets) are de-recognized (i.e. removed from the Company's balance sheet) when the contractual rights to receive the cash flows from the financial asset have expired, or when the financial asset and substantially all the risks and rewards are transferred. Further, if the Company has not retained control, it shall also de-recognize the financial asset and recognize separately as assets or liabilities any rights and obligations created or retained in the transfer.

(B) Non Derivatives Financial Liabilities

Subsequent Measurement

Subsequent to initial recognition, all non-derivative financial liabilities are measured at amortized cost using the effective interest method.

Derecognition of Financial Liabilities

A financial liability is de-recognized when the obligation under the liability is discharged or canceled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de- recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

2.21 Fair value measurement

The Company measures financial instruments at fair value at each balance sheet date using valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured are categorized with fair value hierarchy into Level I, Level II and Level III based on level of input.

2.22 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Company has a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

(B) Fair values hierarchy

Financial assets and financial liabilities are measured at fair value in the financial statements and are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

The categories used are as follows:

Level 1: Quoted prices (unadjusted) for identical instruments in an active market;

Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs;

Level 3: Inputs which are not based on observable market data (unobservable inputs).

Valuation technique used to determine fair value

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, the Company determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method, market comparable method, recent transactions happened in the Company and other valuation models. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Valuation process and technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

Eligible loans valued by discounting the aggregate future cash flows (both principal and interest cash flows) with credit risk-adjusted discounting rate for the remaining portfolio tenor. The Company has considered the average valuation impact arrived using risk free, cost of funds and yield free securitization approach.

The use of net asset value for certificate of deposits and mutual funds on the basis of the statement received from investee party.

(C) Fair value of instruments measured at amortized cost

Fair value of instruments measured at amortized cost for which fair value is disclosed is as follows, these fair values are calculated using Level 3 inputs:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (**FIFP**) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "**SOP**"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "**Competent Authority**") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("**FDI Policy 2020**"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the **FIFP**.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been derecognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non-Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or indirectly but irrevocably, which was in existence as on September 16, 2003 and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), including the exemption under Regulation S ("**Regulation S**") of the U.S. Securities Act.

The above information is given for the benefit of the Applicants / Investors. Our Company and the Lead Manager is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
